

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Suriname. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that's a great starting point. At 16 in Denmark, you're at an important crossroad, and the right path depends on your interests, strengths, and goals. Here's a clear overview of your options and recommendations based on different interests:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

This path prepares you for university and higher education. It usually takes 3 years.

Main options:

- **STX (Almen Studentereksamen):** Broad academic education. Great if you're not yet sure what to study later.
- **HHX (Højere Handelseksamen):** Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen):** Focus on science, tech, and engineering.
- **HF (Højere Forberedelseseksamen):** Shorter (2 years), good if you prefer a more practical academic style.

✅ **Recommended if** you enjoy school subjects and want to keep the door open for university.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This is a more hands-on path, mixing school and work (apprenticeship). Takes about 2–4 years.

Examples:

- Electrician
- Mechanic
- Carpenter
- Healthcare assistant
- Hairdresser
- Chef

✅ **Recommended if** you like practical work, want to earn while learning, and aim to start a career earlier.

3. EUX – Vocational + Academic Combined

This combines vocational training with a gymnasium-level exam. You get both practical skills **and** the option to go to university later.

 **Recommended if** you're interested in a specific job (e.g., IT, business, or trade) **but** want to keep academic doors open.

How to decide?

Here are a few questions you can ask yourself:

- Do I enjoy academic learning or prefer hands-on tasks?
- Do I want to start working earlier or study longer?
- Do I have a strong interest in a specific area like business, healthcare, technology, or creative work?
- How important is going to university for me?

Example scenarios

- If you're curious, love learning, and aren't sure yet — **STX** is a safe and flexible choice.
- If you like numbers, business, or entrepreneurship — go for **HHX**.
- If you're into tech or science — **HTX** or **EUX in tech**.
- If you want a stable job fast and enjoy helping people — consider **EUD in healthcare** or **EUX**.

Bonus tip (from your background)

Your Surinamese-Danish heritage is a strength — being multicultural can open doors in language, communication, and international fields. Think about studying languages, global studies, or international business if that interests you.

Want help narrowing it down? Tell me what subjects or types of tasks you enjoy most — school-wise or in your free time.
