

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sweden. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, fluent in Danish, and just finished primary school in Denmark (which usually ends around age 15-16 with **9th or 10th grade**), you're at an important decision point. In Denmark, after primary school, there are a few common paths depending on your interests, strengths, and future goals. Here are the **main options**, along with recommendations based on different types of students:

1. Gymnasiale uddannelser (Upper Secondary Education)

This is the academic route and is ideal if you think you might want to go to university later.

♦ STX (Studentereksamen)

- Broad, general education (sciences, humanities, social sciences)
- Good if you're not sure exactly what you want to study yet
- 3 years

♦ HTX (Teknisk Gymnasium)

- Focus on technology, natural sciences, and innovation
- Great if you're interested in engineering, IT, or design

♦ HHX (Handelsgymnasium)

- Focus on business, economics, and international trade
- Good for future careers in business or starting your own company

♦ HF (Højere Forberedelseseksamen)

- 2-year academic course, more flexible
- Often chosen by students who didn't thrive in regular school but still want university access

✅ **Recommended if:** You enjoy school subjects and might want to go to university (in Denmark or Sweden), or you're unsure and want to keep your options open.

2. Erhvervsuddannelser (Vocational Education – EUD/EUX)

This combines school and apprenticeship in a real workplace.

♦ EUD (Vocational Education)

- Learn a trade like carpenter, electrician, chef, mechanic, hairdresser, etc.
- Mostly hands-on, practical
- Usually 3-4 years

♦ EUX (Vocational + Academic)

- Mix of vocational training and academic subjects
- Lets you become a skilled worker **and** qualify for university

✅ **Recommended if:** You like practical work and want to get a job quickly, or you're interested in a trade but want the option of higher education too (EUX).

3. International or Cross-Border Options

Since your parents are Swedish, and you might speak or understand Swedish:

- You could consider **studying in Sweden** (Gymnasieskola), especially if you have dual citizenship.
- Some Danish schools offer **IB (International Baccalaureate)** – a globally recognized education in English.

✅ **Recommended if:** You're open to living/studying in Sweden, or want an internationally oriented education.

How to Choose?

Ask yourself:

- Do I like theory and academic subjects, or hands-on/practical tasks?
- Do I want to go to university, or start working soon?
- Do I enjoy working with people, numbers, tools, or computers?

Suggestions Based on Common Profiles

If you're...	You might like...
Curious, academic, open-ended goals	STX or IB
Tech-savvy, like science and design	HTX or EUX (technical)
Business-minded, entrepreneurial	HHX or EUX (business)
Practical, hands-on learner	EUD or EUX
Looking for a faster path or second chance	HF
