

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Syrian Arab Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about your background! It's great that you're thinking seriously about your next step after primary school. In Denmark, you have several educational paths after *folkeskole* (primary and lower secondary education), and your choice depends on your interests, strengths, and future goals.

Here are the main options available to you:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university and other higher education.

Options:

- **STX (Almen studentereksamen)** – Broad academic focus, includes sciences, humanities, and social sciences.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and IT.
- **HF (Højere forberedelseseksamen)** – 2-year general program, often for those who prefer a more practical, less theoretical path to higher education.

Recommended if:

You're interested in going to university later or you like subjects like science, languages, business, or humanities.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - VET)

These prepare you for a skilled trade or profession and often include apprenticeships.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef
- IT Supporter
- Healthcare assistant

Recommended if:

You like working hands-on, want to earn money sooner, or want a faster path to a stable job. You can still take further education later with the **EUX** option.

EUX = VET + Academic subjects

With **EUX**, you can become a skilled worker *and* keep the door open to university.

3. 10th Grade (10. klasse)

Optional extra year after 9th grade.

Recommended if:

You're unsure what to choose yet, want to improve your grades, or just need more time to mature before making a decision.

What to consider:

- What are your favorite subjects?
- Do you prefer theory (studying books, writing papers) or practical work (hands-on learning)?
- Do you want to go to university one day?
- Would you enjoy earning money while studying (through an apprenticeship)?
- Are you more social and energetic or more introverted and focused?

Example Scenarios:

- If you love **science and tech**, consider **HTX**.
- If you're into **business or economics**, **HHX** could be a good fit.
- If you're unsure and want **a broad foundation**, **STX** or **10th grade** might help.
- If you're good with your hands and want to learn a profession, **VET** or **EUX** are strong options.

My Recommendation (based on what you've said):

Since you're fluent in Danish, born in Denmark, and just finishing primary school, you have every opportunity open. If you're not sure yet what you want to do long-term, **taking 10th grade** can be a smart move—it gives you time to explore your interests, improve your grades, and prepare for a more informed choice next year.

From there, **STX** or **EUX** are two strong paths:

- **STX** if you're academically curious and might want university later.
- **EUX** if you want job skills and a practical approach, while still keeping the door open for further study.

Let me know what your interests are—like school subjects you enjoy, hobbies, or career dreams—and I can give you even more tailored advice.
