

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Turkmenistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background – and congratulations on finishing primary school! In Denmark, your next step after primary school (**folkeskole**) typically depends on your interests, strengths, and future goals. Since you're 16 and have completed primary school, you have a few main options in the Danish education system. Here's a clear breakdown and some suggestions to help you decide:

🎓 1. General Upper Secondary Education (Gymnasiale uddannelser)

This path is best if you're interested in academic subjects and maybe want to go to university later.

Options include:

- **STX** (Almen studentereksamen): Focuses on languages, science, and social studies.
- **HHX** (Handelsskole): Focuses on business, economics, and marketing.
- **HTX** (Teknisk gymnasium): Focuses on science, technology, and design.
- **HF** (Højere Forberedelseseksamen): A 2-year academic program, often for students who are a bit older or want a shorter route to higher education.

✅ Good for you if:

- You like school subjects like history, math, science, or business.
- You want the option to attend university or professional education later.
- You're motivated and enjoy learning in a classroom setting.

🔧 2. Vocational Education and Training (Erhvervsuddannelse / EUD)

This is a great path if you want to learn a trade and start working sooner — or even become self-employed someday.

You can train to become:

- Carpenter, electrician, mechanic
- Hairdresser, chef, graphic designer
- Health care assistant, social worker
- And many more...

✅ Good for you if:

- You prefer hands-on learning.
- You want to get a job quickly after school.
- You're interested in a specific trade or craft.

💡 *Bonus:* You can always take extra courses later and still go on to higher education (like **EUX** which combines vocational and academic studies).

3. Other Options

If you're unsure, you could:

- Take a **10th grade (10. klasse)** – This can help you decide what to do next and improve your academic level.
- Attend an **efterskole** – A one-year boarding school experience that mixes learning with personal growth, arts, sports, or special interests.

✅ **Good for you if:**

- You're unsure what you want yet.
- You want a fresh start, new friends, and personal development.

✨ **Personalized Advice Based on Your Background**

- Since you're fluent in Danish and have grown up in Denmark, you have access to the same opportunities as any Danish-born student.
- If you're open to it, your **Turkmen heritage** could be a strength – e.g., if you study international business, language, or social studies.
- If you like both theory and practice, **EUX** (a combined vocational and academic path) might be perfect.
- If you're a strong student, **STX or HHX** opens up many doors for university or professional careers later.

❓ **Questions to Ask Yourself**

- Do I enjoy classroom learning or more hands-on activities?
- Do I want to go to university someday?
- Am I interested in a specific job or field already?
- Would I like to try something new, like an efterskole?

If you want, I can help you decide with a short quiz or explore what your interests and strengths are. Just let me know!
