

Uddannelsesvejledning for ung dansk-vietnameser

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Viet Nam. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that really helps in giving a more tailored recommendation. Since you're 16, fluent in Danish, and have just completed primary school (likely 9th or 10th grade, depending on your path), you're now at a key decision point in the Danish education system. Here are your main options and some thoughts to help guide you:

Your Main Options After Primary School in Denmark

These are the general paths available:

1. Gymnasiale uddannelser (Upper Secondary Education – Academic Path)

Ideal if you're considering university later.

- **STX (Studentereksamen)** – Broad and academic. Good for humanities, science, and social science.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, tech, and engineering.
- **HF (Højere Forberedelseksamen)** – Shorter (2 years), more direct to certain professions or uni.

 *Recommended if you enjoy academic learning and want to keep university open as an option.*

2. EUD / EUX (Erhvervsuddannelser – Vocational Training)

Great if you're hands-on and want to work sooner.

- **EUD** – Train to become a craftsman, electrician, hairdresser, etc.
- **EUX** – Combines vocational training with academic subjects. Gives you a trade + option for university.

 *Good if you like practical work but still want the flexibility of future study.*

What to Ask Yourself

- **Do you enjoy school subjects like math, languages, science, or history?**
→ If yes, consider **STX, HTX, HHX, or HF**.
 - **Do you prefer learning by doing – like cooking, building, working with your hands, or computers?**
→ **EUD or EUX** could be a better fit.
 - **Are you thinking of becoming a doctor, engineer, teacher, business owner, or something else?**
→ Your career dreams can help narrow your choice.
-

With Your Background (Danish-Vietnamese)

Your bilingual/cultural background is a **huge strength** – it could help in fields like:

- **International business (HHX + university)**
 - **Healthcare (HF or STX + nursing/medicine)**
 - **Tech/engineering (HTX or EUX + IT)**
 - **Social work, teaching, or translation**
-

My Suggestion

Since you're fluent in Danish, born in Denmark, and likely open to a broad future:

If you're unsure and want to keep doors open:

STX or EUX are great choices.

- **STX** gives you a wide general education – great if you like school and want to figure it out later.
 - **EUX** gives you job skills + academic credentials – best of both worlds.
-

Would you like help picking based on your interests or favorite school subjects? I can also suggest future careers based on what you're into.
