

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Zambia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — it's great that you're thinking carefully about your next steps. In Denmark, after completing primary school (folkeskole), you typically have a few educational paths to choose from, depending on your interests, strengths, and long-term goals.

Here's a breakdown of your options and some advice tailored to your situation:

1. Gymnasium (STX, HHX, HTX, or HF) – General Upper Secondary Education

These are 2–3-year programs that prepare you for university. You'll get a **studentereksamen (STX)** or another similar qualification.

- **STX (Almen studentereksamen):** Broad focus (science, humanities, social studies).
- **HHX (Højere handelseksamen):** Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen):** Focus on technology, science, and engineering.
- **HF (Højere forberedelseksamen):** A shorter (2-year) option, often for those who want a more practical route to higher education or social/health studies.

Recommended if:

You enjoy academic subjects and want to keep your options open for university (e.g., becoming a doctor, engineer, teacher, psychologist, etc.).

2. EUD / EUX – Vocational Education and Training

These programs combine school and internships with hands-on work experience. You learn a trade or profession like electrician, chef, carpenter, mechanic, healthcare assistant, etc.

- **EUX:** Combines vocational training with general education subjects, so you can still go to university afterward if you want.

Recommended if:

You like learning by doing, want a job sooner, or are interested in practical careers.

3. International/Alternative Schools

If you're interested in an international career or want to use your Zambian background in your education, you might consider:

- **International Baccalaureate (IB):** Taught in English, academically rigorous, and accepted worldwide.
- **Efterskole or Boarding School:** A 1-year option that helps you grow personally and socially before continuing education.

Recommended if:

You're curious about a more international education, want to improve your English, or take a gap year before deciding on a career direction.

How to Decide?

Here are a few questions to help guide your choice:

- Do you like school and studying? → Consider STX or IB.
 - Are you more hands-on and practical? → Look at EUD or EUX.
 - Interested in business or tech? → HHX or HTX could be a great fit.
 - Not sure yet? → HF or a year at an efterskole might help you explore.
-

Final Thoughts for You

As a young person with Zambian roots growing up in Denmark, you bring a unique perspective and possibly multilingual skills that are valuable in many careers — especially in international relations, health, education, and tech. Don't be afraid to aim high and stay curious.

If you want, I can help you make a more detailed plan based on your interests (like science, arts, social work, etc.). What subjects or activities do you enjoy most right now?
