

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Zimbabwe. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — and congratulations on finishing primary school! That's a big step. In Denmark, the next stage after **primary school (folkeskole)** is typically **youth education (ungdomsuddannelse)**, and there are a few paths you can choose depending on your interests, strengths, and long-term goals.

Here's a breakdown of your main options:

🎓 1. Gymnasiale uddannelser (Academic Upper Secondary Education)

These are aimed at students who want to go on to university.

Main types:

- **STX (Almen studentereksamen):** Broad academic focus (languages, science, humanities).
- **HHX (Højere handelseksamen):** Business and economics focused.
- **HTX (Højere teknisk eksamen):** Technology and science focused.
- **HF (Højere forberedelseksamen):** Shorter, more flexible — good if you want a university option but prefer a more practical/less traditional school setting.

Best for you if:

You're academically inclined and think you might want to go to university later (in Denmark or abroad).

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

Focuses on preparing you for a specific job (e.g., electrician, chef, hairdresser, mechanic, IT specialist, etc.).

- Combines **school + apprenticeship** (praktik).
- You can still go to higher education later with an **EUX** option (a combo of vocational and academic).

Best for you if:

You prefer hands-on learning and want to work in a skilled trade or technical field sooner — or still keep the door open for higher education.

✨ Personal Advice Based on Your Background:

Since you're:

- Fluent in Danish ✓
- Have a multicultural background (Zimbabwean roots) ✓
- Just finished primary school ✓
- Open to ideas ✓

Here are three pathways to consider, depending on your interests:

✓ Option 1: STX or HHX (if you're interested in university and enjoy school)

- STX: Great if you're into humanities, languages, science.
- HHX: Perfect if you're interested in business, finance, international trade (and might want to do something between Denmark and Zimbabwe in the future).

✓ Option 2: EUX (if you like practical work but also want academic options)

- This is an excellent "best of both worlds" track.
- You'll get vocational training **and** a studentereksamen-level education.
- You could work in tech, healthcare, business, etc.

✓ Option 3: HTX (if you love science, technology, or engineering)

- Very good foundation if you're into computers, engineering, biology, or invention.
-

Extra Tips:

- **Talk to an educational advisor (Studievejleder)** at your school or municipality.
 - You can **visit schools** during open house (Åbent Hus) to get a feel for the environment.
 - Don't stress too much — the Danish system is flexible, and you can change paths later if needed.
-

Would you like help exploring career ideas based on your personal interests or strengths? I can help with that too.
