

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Andorra. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question! It's wonderful that you're thinking carefully about your next steps. Since you're 16, have completed primary school in Denmark, and are fluent in Danish, you have several good educational options. Let's break it down a bit to help you decide.

Typical educational paths after primary/lower secondary school in Denmark

After *folkeskolen* (or lower secondary school), most young people in Denmark choose between:

Gymnasiale uddannelser (Upper secondary school - academically focused)

- These prepare you for higher education (university).
- Main types:
 - **STX** (*Almen studentereksamen*) – general upper secondary education, broad subjects including humanities, science, and social science.
 - **HHX** (*Højere handelseksamen*) – focus on business, economics, and international trade.
 - **HTX** (*Højere teknisk eksamen*) – focus on technology, science, IT.
 - **HF** (*Højere forberedelseksamen*) – 2-year program, more flexible, often for those who want a shorter upper secondary education.

 Good if you like schoolwork, theory, and want to keep university options open.

Erhvervsuddannelser (Vocational education and training / apprenticeships)

- These combine school with hands-on work and apprenticeship in a company.
- Examples: carpenter, electrician, chef, hairdresser, IT supporter, healthcare worker.
- Often take 3-5 years depending on the program.

 Great if you prefer practical work, want to enter the workforce earlier, or aim for skilled trades.

Combination programs

- **EUX** – combines vocational training with gymnasial-level subjects, so you get both a trade qualification and the option for higher education.

 Good if you want the flexibility of both pathways.

How to choose?

Here are some questions to reflect on:

- Do you enjoy theoretical school subjects (math, history, languages, science)? → STX, HTX, HHX, HF
- Are you more hands-on, creative, or practical? → Vocational education / EUX
- Do you have a particular career dream (engineer, doctor, teacher, chef, entrepreneur)?
- Would you like to study at university later? → Gymnasial programs or EUX
- Do you want to start earning and working sooner? → Vocational programs

Bonus tip: your Andorran background

- If you're interested in international business, tourism, or languages (since Andorra is multilingual), HHX could be a good fit.
- Your multicultural background could be an advantage in programs focused on international relations, trade, or hospitality.

What you could do next

- Visit educational fairs (*uddannelsesmesser*).
- Talk to a guidance counselor (*uddannelsesvejleder*) at your current school.
- Attend open house events (*åbent hus*) at gymnasier or vocational schools.

If you tell me more about your interests (e.g. subjects you like, hobbies, what you imagine doing in the future), I can give a more tailored recommendation! Would you like help thinking that through?
