

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Argentina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question — I'm glad you're thinking carefully about your next step! I'll guide you through your options in Denmark after primary school, and offer some recommendations depending on your interests, strengths, and goals.

Your options after primary school (folkeskole) in Denmark

At 16, you've completed the compulsory education stage. Now you typically choose between:

Gymnasiale uddannelser (general upper secondary education)

These programs are usually 3 years and prepare you for university or other higher education:

- **STX (Studentereksamen):** Broad and academic, with a mix of sciences, humanities, and arts.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination):** Focus on technology, science, and technical subjects.
- **HF (Higher Preparatory Examination):** 2-year program, often chosen by those who want a shorter, more flexible academic path.

Erhvervsuddannelse (vocational education and training / VET)

- These programs combine school and apprenticeship. You train for specific jobs (e.g., electrician, carpenter, chef, social worker).
- You can always pursue further education after completing a vocational education, e.g. through *erhvervsakademi* or *professionsbachelor*.

How to choose?

Let's reflect on:

- ✓ **Your interests:** Do you like academic studies, working with your hands, solving technical problems, creating things, or helping people?
- ✓ **Your strengths:** Are you strong in math, languages, science, practical tasks, or business?
- ✓ **Your future goals:** Do you dream of university, starting work sooner, or traveling/working internationally?

☀️ A recommendation tailored for you

Since:

- you are fluent in Danish
- you have roots in Argentina, which could give you an interest in languages, culture, or international opportunities
- you've completed primary school successfully

👉 If you enjoy academic learning and might want to go to university or keep your options open:

➡️ **STX** is the most flexible, with broad subject choices — and you could choose a study line focusing on languages (Danish, English, Spanish), social sciences, or sciences depending on what you enjoy.

➡️ **HHX** could be a good fit if you're interested in business, economics, or international trade — and might open doors to jobs that connect Denmark and Latin America.

👉 If you prefer a more hands-on, practical education that also leads to a job:

➡️ Consider a **VET program** in a field that interests you. There are many options — IT, design, gastronomy, mechanics, health care, etc.

💡 Other things to consider

- Visit the schools — many offer *brobygning* (bridging courses) where you can try programs before you choose.
- Talk to a **UU-vejleder (youth education counselor)** — they can guide you personally.
- Think about whether you want to stay in Denmark or work internationally in the future — HHX or STX with languages might suit that.

If you tell me:

- what subjects or activities you like most
- what kind of work you see yourself doing in the future (if you have any ideas!)
- whether you prefer academic study or practical work

👉 I can give you a more specific recommendation!

Would you like help mapping that out? 😊
