

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belize. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your next steps! Since you're 16, just finished primary school (or perhaps *folkeskole* if we're using the Danish term), and are fluent in Danish, you have several good options depending on your interests, learning style, and career goals.

Let's break it down a bit:

Common educational paths after folkeskole in Denmark

1 Gymnasiale uddannelser (Upper secondary education)

These are academic programs that prepare you for university. Some main options:

- **STX (studentereksamen)** – broad, general academic program with focus on sciences, humanities, and languages.
- **HHX (higher commercial exam)** – focus on business, economics, and international topics.
- **HTX (higher technical exam)** – focus on technology, natural sciences, and engineering.
- **HF (higher preparatory exam)** – shorter (2 years), for those who prefer a more mature learning environment or didn't go straight from 9th/10th grade.

 **Best if:** you want to keep doors open to university or higher education later.

2 Erhvervsuddannelser (Vocational education & training)

- These combine school and apprenticeship at a company. Fields include everything from carpentry, plumbing, graphic design, hospitality, IT support, to healthcare.
- Usually 3-5 years, and you'll finish with a qualification that lets you work directly in your trade.
- Some programs (EUX) combine vocational training with academic courses so you can also apply to university.

 **Best if:** you want hands-on experience, a job quickly, and like practical learning.

3 Other possibilities

- **10th grade / efterskole** – If you feel you need more time to decide, or want a year to develop personally (sometimes with a focus on sports, arts, music, or international exchange).

- **International programs / IB** – If you're interested in studying in English or abroad later.

🤔 How to decide?

Here are some questions to reflect on:

- Do you enjoy academic subjects (math, science, languages, history)?
- Do you prefer practical, hands-on work or classroom learning?
- Are you interested in going to university in the future?
- Do you want to enter the job market sooner?

💡 My recommendation (general guidance)

- ➔ If you enjoy school subjects and want flexibility: **STX, HHX, or HTX**
- ➔ If you want a job-oriented education and practical skills: **Erhvervsuddannelse or EUX**
- ➔ If you're unsure and want to grow personally: consider **10th grade or efterskole**

🎯 Tip

Since you have a unique background (Danish-Belizean), you might also think about:

- Choosing a program that allows you to build on your international identity — e.g., HHX (with focus on international business) or STX with language focus.
- Exploring exchange opportunities or schools that encourage cultural diversity.

If you want, I can help you:

- ✓ Explore specific schools near you
- ✓ Compare STX, HHX, HTX, EUX programs
- ✓ Find guidance counselors or open house events

Would you like me to help you with that? Or do you already have some preferences or interests you want to share?
