

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brazil. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a really thoughtful question, and it's great that you're considering your next step carefully! Since you're 16 and have just finished *folkeskolen* (primary and lower secondary school), you have several good options in Denmark. I'll break them down and share some ideas based on your situation:

Main educational paths after primary school

1 Gymnasiale uddannelser (general upper secondary education)

These programs prepare you for university. Good if you enjoy academic subjects and want to keep your options open for higher education. Examples:

- **STX (studentereksamen)** – broad and academic focus with lots of subjects (humanities, science, languages)
- **HHX (higher commercial exam)** – focus on business, economics, and international trade
- **HTX (higher technical exam)** – focus on technology, science, and design
- **HF (higher preparatory exam)** – shorter (2 years) and more practical, for those who want to go on to university but not do 3 years of gymnasium

✓ Good fit if:

- You like studying academic subjects
- You're interested in university or higher education
- You want to keep your future options open

2 Erhvervsuddannelser (vocational education and training, EUD)

These combine school and apprenticeship. You learn a trade (e.g. electrician, chef, carpenter, hairdresser) and often get paid during your apprenticeship.

✓ Good fit if:

- You want to work with your hands or in a specific trade
- You prefer practical learning rather than academic
- You want to start working sooner

3 Combination programs (eux)

These combine vocational training (EUD) with gymnasium-level exams, so you can both work in a trade and have the option to go to university later.

✓ Good fit if:

- You want a practical skill + academic options
- You like flexibility for the future

☀ Factors to consider

- **What subjects do you enjoy?** Are you drawn to science, humanities, business, art, technology, languages?
- **How do you prefer to learn?** More academic and theoretical? Or more practical and hands-on?
- **Do you have career dreams already?** If you have ideas (e.g. doctor, engineer, entrepreneur, chef, designer), we can match the path to your dream.

🇧🇷 Your background

Since you have Brazilian roots and you're fluent in Danish, you have a unique advantage. Maybe consider:

- Taking extra languages (Spanish, Portuguese, English, German) if you do STX or HHX → this could give you international career options.
- Programs or schools with international focus (e.g. International Baccalaureate / IB, or HHX with global trade profile)

💡 Recommendation

👉 If you enjoy studying and want to keep your options open:

STX or HHX could be a great fit (especially HHX if you're interested in business or international trade, given your Brazilian background).

👉 If you prefer hands-on learning:

Consider **EUD** or **EUX** so you can gain a trade and still have university options.

👉 If you're unsure:

Talk to a *UU-vejleder* (youth education counselor) at your local *Ungdommens Uddannelsesvejledning*. They can help you find your best fit.

⚡ Next step: If you want, tell me:

- What subjects you like most?
- Do you have hobbies or career ideas?
- Do you want to study at university later, or start working sooner?

That'll help me give you a more tailored recommendation! 🚀
