

# Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Burkina Faso. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your next step! Since you're 16 and have completed primary school in Denmark (which typically means **folkeskole** up to 9th or 10th grade), you're at the stage where you choose an upper secondary education (**ungdomsuddannelse**). Let's break down your options and some considerations that might help you decide:

## 🎓 Main educational paths in Denmark after primary school

### 1 Gymnasiale uddannelser (General upper secondary education)

These prepare you for higher education (e.g. university):

- **STX (Almen studentereksamen)** → broad focus on humanities, natural science, and social science.
- **HHX (Højere handelseksamen)** → focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** → focus on technology, natural science, and innovation.
- **HF (Højere forberedelseseksamen)** → shorter (2 years), good for adults or students who want a more practical academic path.

### ✅ Why choose a gymnasial path?

If you're interested in continuing on to university or want to keep your options open for a wide range of professions, this is a strong choice.

### 2 Erhvervsuddannelser (Vocational education & training - EUD)

These combine school and apprenticeship in a company (dual education system). You can become:

- A craftsman (carpenter, electrician, mechanic)
- A health worker (social- og sundhedsassistent)
- A chef, hairdresser, office assistant, etc.

### ✅ Why choose EUD?

If you like practical work and want to start earning while learning, this is a good choice. There are good job prospects, and you can later add on higher vocational or technical qualifications.

### 3 EUX (Kombineret erhvervs- og gymnasieuddannelse)

This is a mix of vocational training and general upper secondary education. You get both a trade qualification and a studentereksamen-level exam.

#### ✓ Why choose EUX?

If you're interested in a trade but want the option to go to university later, this is a flexible path.

### Things to consider

#### 👉 What are your interests and strengths?

Do you like working with people? Numbers? Technology? Art?

Do you prefer theoretical learning or practical tasks?

#### 👉 Where do you see yourself in the future?

Do you want to go to university, or do you want to work sooner?

#### 👉 Language and cultural strength

Your bilingual and multicultural background could be a huge asset in areas like international business, diplomacy, social work, or education.

### 💡 My general recommendation (based on your info so far)

Since you're fluent in Danish and you've successfully completed primary school in Denmark:

- **If you're unsure what you want to do yet** → STX or HF could be good, as they keep doors open for university and many careers.
- **If you're interested in business or trade (and perhaps Burkina Faso or international work later)** → HHX or EUX business could suit you.
- **If you like working with your hands or want to enter the workforce sooner** → EUD or EUX could be exciting.

### ☀ Next steps

- ✓ Visit educational fairs or open house events at local gymnasiums or vocational schools.
- ✓ Talk to a **UU-vejleder** (educational guidance counselor). They can give you personalized advice and help you apply.
- ✓ Try a **brobygning / praktik** (intro courses or internships) if you're unsure — they're designed to help students experience different educations before choosing.

If you want, you can tell me more about your interests and what subjects you enjoy, and I can help you make a more specific suggestion! 😊
