

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cabo Verde. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps! Since you've just finished primary school (or more precisely, *folkeskole*), you're at a point where you have several good options depending on your interests, strengths, and future goals. Let's break it down.

Your educational options in Denmark after primary school

Here are the main pathways:

1 Gymnasiale uddannelser (Upper Secondary General Education)

These are for you if you want to continue to higher education (university or other tertiary studies).

- **STX (Alment gymnasium)** – Broad and academic, with focus on sciences, humanities, and social sciences.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international relations.
- **HTX (Teknisk gymnasium)** – Focus on technology, natural sciences, and technical subjects.
- **HF (Højere Forberedelseseksamen)** – 2-year general program, often for older students or those who want a shorter path to higher education.

2 Erhvervsuddannelser (Vocational Education & Training / VET)

If you prefer practical, hands-on learning and want to go directly into a trade or profession (e.g. electrician, carpenter, chef, health care worker).

These programs often combine school and apprenticeship.

3 Kombinationsforløb (EUX)

This combines VET with upper secondary academic subjects, so you can both get a trade and qualify for university.

Factors to consider

✓ What are your interests?

- Do you enjoy academic subjects (e.g. languages, science, maths, social science)?
- Or do you prefer practical, hands-on tasks?

✓ How do you learn best?

- Do you like classroom learning and books? (Points to gymnasium)

- Or learning by doing and working? (Points to vocational education)

✓ Your future dreams

- Do you want to go to university? (Gymnasium or EUX)
- Or start working in a trade or profession after education? (VET)

☀ Personalized advice

Since you're fluent in Danish and have a multicultural background (Danish + Cabo Verdean), you could consider:

- **STX** if you like broad academic subjects, and maybe want to explore languages, social studies, or sciences.
- **HHX** if you're interested in business, international trade, or economics — it could tie in nicely with global perspectives.
- **EUX** if you want a solid trade but also keep the door open for university.

📝 My recommendation

👉 If you're unsure and want to keep as many doors open as possible:
STX or EUX — they give you flexibility later.

👉 If you know you like business or international topics:
HHX could be a great fit.

👉 If you enjoy practical work and want to start a career sooner:
VET (erhvervsuddannelse) — maybe combined with EUX.

💡 Next steps

- ✓ Talk to a school counselor (UU-vejleder) — they can help you explore options based on your grades and interests.
- ✓ Visit open house events at gymnasiums and vocational schools to get a feel for what suits you.
- ✓ Think about what kind of school environment you'll thrive in.

If you want, I can help you:

- Compare specific schools or programs near where you live.
- Make a list of pros and cons for each path.
- Explore future jobs linked to these educational paths.

Would you like that? Or can you tell me a bit more about your interests? 😊
