

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Canada. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question — and it's fantastic that you're already reflecting on your future! Let's break it down thoughtfully. Since you've just finished primary school (folkeskole) at around age 16 in Denmark, your next step usually involves choosing a youth education (*ungdomsuddannelse*). The best path depends on your interests, strengths, and future ambitions. Here's an overview to help you consider your options:

Main educational paths after primary school in Denmark

1 Gymnasiale uddannelser (Upper secondary education / academic path)

These prepare you for higher education (university, professional bachelor, etc.)

- **STX (Almen studentereksamen)** – broad academic program (focus on humanities, sciences, social sciences, arts).
- **HHX (Handelsgymnasium)** – business- and economics-focused.
- **HTX (Teknisk gymnasium)** – technical and science/technology-focused.
- **HF (Højere Forberedelseseksamen)** – shorter (2 years), more practical/academic mix, often for those who want faster access to higher education.

 *Good for you if:*

You enjoy academic subjects, want to keep options open, or plan to go to university.

2 Erhvervsuddannelser (Vocational education & training / apprenticeships)

These combine school and apprenticeship in a company.

- Examples: carpenter, electrician, chef, hairdresser, IT support, etc.
- Takes 3-5 years depending on the trade.

 *Good for you if:*

You prefer hands-on learning, want to work sooner, or like practical tasks.

3 International options

Since you have Canadian roots and speak English fluently (I assume!), you could consider:

Printed using [ChatGPT to PDF](#), powered by PDFCrowd [HTML to PDF API](#).

- **International Baccalaureate (IB)** — an internationally recognized academic program taught in English, offered at several Danish schools.
- **International schools or exchange programs** — could be a good fit if you're considering future studies or work abroad.

👉 *Good for you if:*

You're interested in studying internationally later, or you want an English-language academic environment.

🔑 Things to think about

- ✓ What subjects do you enjoy most? (e.g. languages, science, business, technology, arts?)
- ✓ Do you prefer theoretical/academic learning or practical/hands-on learning?
- ✓ Do you want to keep options open for university, or would you prefer to train for a specific job sooner?
- ✓ Are you interested in studying or working in Canada or another country later?

✨ My recommendation (based on your situation)

Since you're fluent in Danish and have a Canadian background, you might benefit from combining Danish and international opportunities. For example:

- **STX or IB Diploma Programme** if you enjoy a broad academic focus and want to keep doors open for universities both in Denmark and abroad (including Canada).
- **HTX** if you're passionate about science, technology, or engineering.
- **HHX** if you're business- or economy-minded.
- **Vocational education** if you already know you want a specific skilled trade and prefer learning by doing.

💡 **Tip:** It can help to visit open house events at local gymnasiums and vocational schools to get a feel for the environment and ask questions.

If you want, you can tell me more about:

- 👉 What subjects or activities you like most
- 👉 Whether you're considering university
- 👉 If you'd like to live or study in Canada later

...and I can give a more tailored recommendation! Would you like help exploring that? 😊
