

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chad. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and exciting stage you're at—congratulations on finishing primary school! In Denmark, after primary school (folkeskole), you have several great options depending on your interests, strengths, and future ambitions. Let's explore some paths and ideas that could help guide your decision:

Your Main Options After Primary School

1 Gymnasiale uddannelser (General Upper Secondary Education)

If you want to keep your options open for university studies, these could be good:

- **STX (Studentereksamen)** – Broad academic focus (languages, humanities, social sciences, sciences).
- **HHX (Higher Commercial Examination)** – Business, economics, marketing focus.
- **HTX (Higher Technical Examination)** – Science, technology, engineering focus.
- **HF (Higher Preparatory Examination)** – 2-year academic track, often for more mature students or those who want a shorter route.

 *Best if you like studying theory, want to go to university later, or are still figuring out your future field.*

2 Erhvervsuddannelse (Vocational Education and Training - EUD)

If you're more interested in practical skills and want to enter the job market sooner (or later become a master craftsperson or technician):

- Examples: carpenter, electrician, chef, healthcare assistant, IT support, etc.
- Mix of school and apprenticeship.

 *Best if you enjoy hands-on learning, earning while learning, and can see yourself in a skilled trade or technical job.*

3 Kombinerede uddannelser (e.g., EUX)

A mix of vocational training and gymnasial level education. You get both a vocational qualification and eligibility for university.

 *Great if you want both practical skills and the option for further academic study later.*

How to Choose?

✓ **Think about your interests:**

What subjects or activities do you enjoy most? Science? Business? Languages? Hands-on tasks?

✓ **Think about your strengths:**

Are you stronger in theoretical work, practical tasks, or a mix?

✓ **Think about your future goals:**

Do you already have a dream job? Or do you want to keep options open?

✓ **Consider trying out options:**

In Denmark, you can often do a *brobygning* (introductory course or bridge-building course) to try different educational paths.

 Special Advice for You

Since you speak fluent Danish and have roots in two cultures (Danish + Chadian), you could consider:

- Language-heavy programs (STX with focus on languages or social studies)
 - International studies (some gymnasier have global or international tracks)
 - Business/economics (HHX), if you're interested in future work between Denmark, Africa, or globally
 - Technology (HTX), if you're curious about engineering, IT, or innovation
-

 Want help deciding?

If you want, tell me:

- What subjects you like most in school?
- What hobbies or interests you have?
- Whether you prefer classroom learning or more practical, hands-on activities?

Then I can give you a more tailored recommendation!

Would you like help exploring specific schools or programs near where you live in Denmark?
