

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Colombia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing about yourself — it sounds like you have a solid foundation and exciting choices ahead! Since you're 16, finished primary school, and fluent in Danish, you're likely deciding between different secondary education options (ungdomsuddannelser) in Denmark. Let's break down the main paths and some ideas for how you can think about them.

Your options in Denmark

At your stage, the typical educational paths are:

Gymnasiale uddannelser (academic upper secondary education)

These are general education programs preparing you for university:

- **STX (studentereksamen)** – the general upper secondary school (broad subjects, focus on humanities, sciences, social sciences)
- **HHX (higher commercial examination)** – focus on business, economics, marketing
- **HTX (higher technical examination)** – focus on technology, science, and innovation
- **HF (higher preparatory examination)** – a shorter (2-year) program, often more practical/theoretical mix, suited if you prefer applied learning

 Good if you want to keep doors open for university, academy professions, or if you like academic subjects.

Erhvervsuddannelser (vocational education and training, VET)

These combine school and apprenticeship in a company:

- Fields like IT, health care, mechanics, culinary arts, carpentry, childcare, etc.

 Good if you want practical experience, earn a salary during education, and aim for a skilled profession.

Combination paths

- **EUX** – mix of vocational and gymnasial education. You get both a skilled trade and the option to apply to higher education later.

 Great if you want practical skills *and* to keep the possibility of going to university.

How to choose?

Consider:

- ✓ **What do you enjoy?** – Are you more into theory (math, literature, science) or practical work (building, creating, helping people)?
- ✓ **Where do you see yourself?** – Do you want to work right after school, or study further (university/college)?
- ✓ **Your strengths** – Are you strong in subjects like languages, technology, arts, sports, business?
- ✓ **Lifestyle** – Do you want hands-on work early, or more school-based learning for a few years?

🌟 Extra ideas considering your background

- Being bilingual (Danish and probably Spanish) is a huge strength — you might explore international studies, languages, business with Latin America focus, or even tourism.
- Denmark offers exchange opportunities or international programs — some gymnasier have global studies lines, IB (International Baccalaureate), or bilingual options.

Next steps

 I recommend:

- 1 Visit **uddannelsesguiden.dk** (UG.dk) and try their interest tests.
- 2 Visit **open houses (åbent hus)** at local gymnasier and vocational schools.
- 3 Consider speaking with a **UU-vejleder (educational counselor)** — they can help you match your interests with the right path.

✨ If you want, tell me:

- What subjects do you enjoy most?
- Do you want to work soon, or focus on further study?
- Do you like the idea of practical/apprenticeship learning?

I can then suggest a more tailored path!
