

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Czechia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps! Since you've completed primary school in Denmark and are fluent in Danish, you have several solid options in the Danish education system. Let's look at the most common paths after primary school (*folkeskole*), and I'll suggest how you might choose based on your interests and goals.

🎓 Main educational paths after 9th or 10th grade

1 General Upper Secondary Education (*Gymnasiale uddannelser*)

These are mainly for those who want to go on to university:

- **STX (Almen studentereksamen)** — broad academic focus (humanities, science, social science)
- **HHX (Højere handelseksamen)** — business and economics focus
- **HTX (Højere teknisk eksamen)** — technology, science, and innovation focus
- **HF (Højere forberedelseseksamen)** — a 2-year general academic path (good for those who want a shorter program or a different learning style)

👉 Recommended if:

- You enjoy academic subjects
- You think you might want to go to university later
- You're not yet sure what specific job you want

2 Vocational Education and Training (*Erhvervsuddannelser / EUD*)

These are for students who want to combine school with practical work and apprenticeships:

- Examples: electrician, carpenter, chef, hairdresser, IT supporter, etc.

👉 Recommended if:

- You prefer hands-on learning
- You want to get a skilled trade qualification and start working sooner
- You know what kind of job you're interested in

3 Other options

- **International programs (e.g. IB)** — if you want an international diploma in English
- **Folk high schools (*efterskole* / *højskole*)** — a year focused on personal development, often combined with subjects like art, music, sports
- **10th grade (*10. klasse*)** — if you want to strengthen your academic level or need more time to decide

? How to decide

Here are some things to reflect on:

- ✓ Do you like academic subjects and theory, or do you prefer practical, hands-on work?
- ✓ Do you already have an idea of your future career or field of interest?
- ✓ Do you want to go to university later?
- ✓ How do you like to learn — classroom-based or learning-by-doing?

🇩🇰💡 My general advice for you

Since you're fluent in Danish and have both Danish and Czech background, you could consider paths that allow you to later work internationally — e.g. STX, HHX, or IB, if you enjoy academic work.

If you're more practically inclined, EUD can give you strong job skills and good career opportunities.

🚀 Next step

If you like, I can:

- Help you compare STX, HHX, HTX, HF, and EUD in detail
- Suggest specific schools near you in Denmark
- Help you explore combinations (e.g. EUX = vocational + academic combined)

Would you like that? And do you already have an idea of what subjects or jobs interest you most? 😊
