

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Fiji. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking ahead about your future! Since you've just finished primary school (which in Denmark usually means **9th or 10th grade** depending on your path), you're at an important crossroads. Let's break down your options, and I'll provide some recommendations based on your situation:

🎓 Your Main Educational Options After Primary School

In Denmark, you typically choose between:

1 Gymnasiale uddannelser (Upper secondary education for university preparation)

- STX (Studentereksamen – general academic)
- HHX (Higher commercial examination – business/economics focus)
- HTX (Higher technical examination – technology/science focus)
- HF (Higher preparatory examination – shorter, 2-year option)

2 Erhvervsuddannelser (Vocational education and training, VET)

- Combines school and apprenticeship → leads to a skilled trade or profession.
- Includes areas like carpentry, electrician, health care assistant, chef, etc.

3 Kombinationsuddannelser (e.g., eux)

- Combines vocational education with a gymnasium-level exam → gives both practical skills and eligibility for university.

☀️ What Might Fit You?

Since you're fluent in Danish and have a multicultural background, you have lots of strengths. The best path depends on:

- ✓ Your interests: Do you like academic study, hands-on work, business, technology, creative arts?
- ✓ Your future goals: University? Job after secondary school? International opportunities?
- ✓ How you learn best: Do you prefer theory or practical work?

💡 Some recommendations to consider

- **If you want to keep doors open for university** →
 - *STX* (broadest academically)
 - *HHX* (if you're interested in business, economics, marketing)
 - *HTX* (if you like science, technology, IT, engineering)
 - **If you want to learn a trade and work sooner** →
 - *Vocational education (EUD)* or *EUX* (if you want both vocational training + university option)
 - **If you're unsure and want flexibility** →
 - *STX* or *EUX* would give you the most options later.
-

Other things to think about

- With your Fijian background, you might find value in international programs, language studies, or global business tracks (many schools offer English-language or international studies options).
 - Consider visiting **uddannelsesmesse** (education fairs) or talking to a guidance counselor (**UU-vejleder**) – they can help match your interests to the right education.
-

 **If you tell me more about your interests (e.g., subjects you enjoy, what you see yourself doing), I can give you a more tailored recommendation!**

Would you like help figuring out which path matches your strengths? Or I can suggest schools/programs near where you live in Denmark if you tell me your city or region.
