

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from France. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

That's a great and important question! Let's break it down so you can make a well-informed choice. Since you're 16, living in Denmark, and just finished primary school (I assume you mean *folkeskole* up to 9th or 10th grade), you're now looking at your *ungdomsuddannelse* (youth education). Here are your main options, plus considerations given your background:

Main educational paths in Denmark after primary school

Gymnasiale uddannelser (general upper secondary education)

These prepare you for higher education (university, etc.). Examples:

- **STX (studentereksamen)**: Broadest, with humanities, social sciences, natural sciences.
- **HHX**: Focus on business, economics, international trade.
- **HTX**: Focus on technology, science, and technical subjects.
- **HF**: 2-year general upper secondary education (often for people who want a faster route to higher ed or have had a break in education).

 *Since you're fluent in Danish and have a multicultural background, STX or HHX might appeal if you enjoy languages, culture, social studies, or business.*

Erhvervsuddannelser (vocational education and training - EUD)

This combines school with apprenticeships. You train for a specific trade or profession (e.g. carpenter, chef, electrician, health care assistant). You earn while you learn.

 *Great if you prefer practical work or want to enter the job market earlier.*

International/alternative options

- **International Baccalaureate (IB)**: Taught in English, globally recognized.
- **French sections / Lycée Français**: If you want to connect more with your French heritage or consider future study/work in France.
- **Efterskole or boarding schools**: Some students choose a year at an *efterskole* to focus on personal growth, sports, arts, etc., before moving on.

Things to consider in your choice

- ✓ **Your interests** – Do you enjoy theory, practical work, creative subjects, science, languages?
 - ✓ **Your strengths** – What subjects do you excel at?
 - ✓ **Future plans** – Do you want to go to university? Work sooner? Study abroad?
 - ✓ **Language and culture** – Since you have a French background, maybe programs with international focus could open more doors (e.g. HHX with international business, or IB).
 - ✓ **Social environment** – Some schools are bigger/smaller, or have a more academic/practical/creative focus.
-

☀ **My recommendation (based on what you shared)**

- ➔ If you're still open and want to keep many doors open: **STX** (especially with language and social science tracks) or **HHX** (if business and international trade interest you).
 - ➔ If you're drawn to practical, hands-on learning: **Erhvervsuddannelse** with apprenticeship.
 - ➔ If you're curious about an international environment: **IB** or a Danish gymnasium with strong language programs.
-

✉ **If you want, tell me:**

- What subjects do you enjoy most?
- Do you think you want to go to university?
- Are you more theoretical or practical?

Then I can give you a more tailored suggestion!

Would you like help looking at specific schools or programs near where you live?
