

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guatemala. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Living in Denmark with roots in Guatemala gives you a unique cultural background and potential for a strong international perspective — that's a great asset. Since you just finished primary school (which usually ends after 9th grade in Denmark), your next step will depend on your interests, strengths, and goals.

Here's a breakdown of the most common educational paths after primary school in Denmark, along with guidance based on different interests:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic programs that prepare you for university.

Options:

- **STX (Studereksamen)** – Broad general education (humanities, sciences, social studies).
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on science, technology, and engineering.
- **HF (Højere Forberedelseksamen)** – 2-year program, more flexible, for students who want a shorter academic path.

✅ Choose this if:

You enjoy studying, want to keep your university options open, or are interested in fields like law, medicine, engineering, economics, or communication.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

Hands-on education that prepares you for a specific job (e.g., carpenter, electrician, chef, hairdresser, IT technician).

✅ Choose this if:

You prefer practical learning, want to enter the workforce sooner, and enjoy working with your hands or tools.

You can also combine vocational education with a high school diploma in a **EUX program**, which gives you both work qualifications and eligibility for university.

3. International or Bilingual Paths

Given your Guatemalan background and Danish fluency, you might thrive in:

- **International Baccalaureate (IB)** – A globally recognized academic program in English.
- **Bilingual or international schools** – Some offer programs in both Danish and English or Spanish.

✅ Choose this if:

You're considering studying or working abroad in the future or want to enhance your global outlook.

How to Decide

Here are a few questions to ask yourself:

- **What subjects do you enjoy most?** (Math, languages, science, arts?)
- **Do you prefer theory or practice?**
- **Do you see yourself going to university?**
- **Are you more interested in getting a job sooner?**
- **Do you like working with people, computers, tools, or ideas?**

Personalized Recommendations

Here are three sample paths depending on your interests:

A. You like academics, languages, and global issues:

➡ STX or IB

- Ideal for careers like law, journalism, international relations, or teaching.
- Bonus: You could study or work in Denmark or abroad.

B. You like business, finance, or starting a company:

➡ HHX

- You'll learn about marketing, entrepreneurship, and economics.
- Good if you're thinking of starting your own business or working in a company.

C. You like building, fixing, or creating things:

➡ EUD (maybe with EUX)

- You could become an IT technician, mechanic, or designer.
- Great if you like practical tasks and want job experience fast.

Final Tip

Try talking to a **studievejleder (student counselor)** at your local **ungdomsuddannelse center**. They can guide you through options based on your grades, interests, and future goals.

If you'd like, I can help you explore career ideas or match your interests with education paths – just tell me what you enjoy or dream of doing!
