

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guinea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking seriously about your future. Since you've just finished primary school in Denmark (Folkeskole), you have several good options depending on your interests, strengths, and long-term goals.

Here's a breakdown of the most common educational paths in Denmark after 9th or 10th grade:

♦ 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academically focused and prepare you for university.

✓ Best if you:

- Enjoy school subjects like languages, science, or social studies.
- Might want to go to university in the future.

Main options:

- **STX (Almen studentereksamen)** – General education with focus areas like science, languages, or humanities.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere forberedelseseksamen)** – A 2-year option often chosen by more mature students or those who want a shorter route to university.

♦ 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are hands-on programs that combine school and apprenticeships (praktik) in companies.

✓ Best if you:

- Prefer practical learning over academic work.
- Want to start working soon after education.
- Are interested in trades like carpentry, electrician, hairdressing, healthcare, or business.

Example:

- You could become a **mechanic, IT-supporter, social- og sundhedsassistent, kok**, etc.

♦ 3. Kombineret Forløb (EUX)

A mix of vocational education and general education. You get both a studentereksamen **and** a vocational qualification.

✓ Best if you:

- Want both practical experience **and** the option to go to university later.
- Are willing to work hard — EUX is demanding.

♦ 4. 10. klasse (Optional)

Some students choose to take an extra year to mature, improve grades, or figure out what they want.

✓ Best if you:

- Aren't sure what direction to choose yet.
- Want to build confidence or improve academic skills.

What should you consider when choosing?

1. What subjects do you enjoy most?
2. Do you like learning through books and theory, or through doing and practicing?
3. Do you already have a career dream or interest (like working with people, technology, business, healthcare, etc.)?
4. Do you want to study at university one day, or do you want to get into a job sooner?

My Suggestion (based on what you've told me):

Since you're fluent in Danish and just finished primary school in Denmark, all doors are open to you.

- If you're curious about many things, enjoy school, and want options later — consider **STX or HHX**.
- If you're more hands-on and want to work soon or learn a craft — consider **EUD or EUX**.
- If you're unsure — **10. klasse** could give you time to explore and build confidence.

Would you like to tell me more about your interests or what you're good at? I can help you narrow it down even more.
