

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Honduras. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a big and exciting moment—congratulations on finishing primary school! 🎓 Since you're in Denmark, there are a few main paths you can take after primary school (folkeskolen), depending on your interests, strengths, and long-term goals. I'll walk you through the main options, and then we can narrow it down based on what kind of person you are and what you enjoy.

🎯 Main Educational Options in Denmark After 9th or 10th Grade

1. Gymnasium (STX, HHX, HTX, or HF)

These are academic upper secondary programs, usually lasting 2–3 years.

- **STX (Alment Gymnasium):** General subjects (math, science, languages, humanities). Good if you want to keep doors open for university.
- **HHX (Handelsskolen):** Business, economics, and marketing. Great for business careers or entrepreneurship.
- **HTX (Teknisk Gymnasium):** Focus on technology, science, IT. Perfect if you're into engineering, computers, or science.
- **HF (Højere Forberedelseksamen):** A more flexible, 2-year academic program—often chosen by people who prefer a less traditional school structure.

👉 *These paths prepare you for university (long-term education).*

2. Erhvervsuddannelse (EUD – Vocational Education and Training)

- Learn a profession (like carpenter, electrician, hairdresser, chef, social worker, etc.)
- Combines school with paid apprenticeships (praktik).
- Often faster entry into the job market (2–4 years).

👉 *Good if you like working with your hands, learning by doing, or want to start earning money sooner.*

3. Kombineret Forløb (EUX)

- Combines vocational training (EUD) with academic courses (like gymnasium).
- You get both a studentereksamen **and** a skilled trade education.

👉 *Best for students who want both options: job training + possibility for higher education.*

How to Decide?

Here are a few questions that can help narrow it down:

1. Do you enjoy academic subjects like math, science, history, or literature?

- Yes → Consider STX, HTX, or HHX.
- No or only a little → Consider EUD or EUX.

2. Are you interested in working with your hands, being practical, or starting work earlier?

- Yes → EUD or EUX could be perfect.
- No → Maybe focus on gymnasium.

3. Do you have an idea of what career you might want?

- For example:
 - Doctor → STX (science focus)
 - IT specialist → HTX or EUX
 - Entrepreneur → HHX
 - Chef or electrician → EUD
 - Social worker or nurse → STX or HF

Your Personal Background

- Being bilingual and having a multicultural background is a **huge strength**—especially in jobs that involve communication, community work, international business, or education.
- If you want to give back to your community or work internationally one day, consider paths that develop social skills or language abilities (like STX or HHX).

Suggested Next Steps

1. Attend "Brobygning" or Orientation Courses

- Most schools offer short trial courses (a few days) to try out different paths before choosing.

2. Visit educational fairs or open house events (uddannelsesmesse, åbent hus).

3. Talk to a vejleder (educational counselor) at your local UU center (Ungdommens Uddannelsesvejledning)—they can help guide you with your interests.

4. Ask Yourself:

- What do I like doing in school?
- Do I want to study more or start working soon?
- What kind of life do I want in 5–10 years?

Would you like help figuring this out based on your interests (like subjects you enjoy, hobbies, or dream jobs)? I can help you narrow it down step by step.
