

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Iran (Islamic Republic of). I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a big and exciting step — congratulations on finishing primary school! In Denmark, you have several educational options after 9th or 10th grade, and the right path depends on your interests, strengths, and long-term goals.

Here's a breakdown of your main options:

1. Gymnasium (STX, HTX, HHX) – Upper Secondary School (3 years)

These are academic routes that prepare you for university.

• STX (Almen studentereksamen)

- Focus: General education (humanities, social sciences, natural sciences).
- Great if you enjoy a broad curriculum and want to keep many university options open.

• HTX (Teknisk studentereksamen)

- Focus: Science, technology, and innovation.
- Good if you're into subjects like physics, chemistry, IT, or engineering.

• HHX (Højere handelseksamen)

- Focus: Business, economics, and marketing.
- Useful if you're interested in entrepreneurship, economics, or business-related fields.

Recommended if:

You enjoy academic subjects and might want to go to university later.

2. EUD (Erhvervsuddannelse) – Vocational Education and Training (2-5 years)

- Combine school and hands-on apprenticeship.
- Examples: Electrician, mechanic, hairdresser, chef, carpenter, healthcare assistant.

Recommended if:

You prefer practical learning, want to start working sooner, and like specific trades or crafts.

3. EUX – Vocational + Academic (4-5 years)

- Combines EUD and Gymnasium.
- You get a trade **and** the qualifications to go to university.
- It's more demanding but keeps all doors open.

Recommended if:

You want a job-ready skill **and** the option for higher education later.

4. International options / IB (International Baccalaureate)

- Taught in English, international curriculum.
- Can be helpful if you want to study or work abroad later.

Recommended if:

You're confident in English and want a globally oriented education.

? Things to think about when choosing:

- Do you enjoy reading, writing, and academic work?
- Are you more hands-on and like learning by doing?
- What subjects or activities make you feel motivated or excited?
- Do you think you'll want to go to university one day?
- What do you value more: flexibility, stability, creativity, or working with people?

Personalized Suggestion for You (based on what you said)

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school, you have full access to the education system like anyone else.

If you're not sure what you want yet but want to keep options open:

STX or EUX could be great choices.

- **STX** if you like academic studies and want a broad education.
- **EUX** if you like the idea of learning a trade and still want the possibility of university later.

If you already know you love working with your hands, want to become a craftsman, chef, or health worker:

EUD might be right for you.

What to do next:

1. **Talk to a student counselor** (studievejleder) at your school or municipality.
 2. **Visit educational fairs or open house events.**
 3. **Try a "Brobygning" program** (bridge-building/intro weeks at schools).
 4. **Ask yourself:** Where do I see myself in 5 years?
-

Would you like help exploring a specific field (like IT, healthcare, design, etc.) or narrowing down your interests? I'd be happy to help!
