

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Jordan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! At 16 and having just finished primary school (which in Denmark typically includes the 9th or 10th grade), you're at a key decision point. Denmark's education system offers several strong paths after primary school depending on your interests, strengths, and goals. Here's a breakdown of your main options and some tailored advice:

Main Educational Paths in Denmark After Primary School:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are more academic and prepare you for university.

- **STX (Almen studentereksamen):** Broad general education. Great if you're not sure what you want to study later or want flexibility.
- **HTX (Teknisk studentereksamen):** Focuses on science and technology. Good if you're interested in engineering, IT, or health sciences.
- **HHX (Højere handelseksamen):** Focus on business, economics, and international trade. Ideal if you're interested in business, finance, or entrepreneurship.
- **HF (Højere forberedelseksamen):** A shorter, 2-year academic path often used if you're slightly older or want a more practical route to university.

✓ Recommended if:

- You enjoy academic subjects.
- You're interested in going to university.
- You're still figuring out your exact career path.

2. Erhvervsuddannelser (Vocational Education and Training - VET/EUD)

More practical and job-focused education. Combines school with apprenticeship.

- Includes fields like carpentry, electrician, IT support, healthcare, childcare, culinary arts, etc.
- You often start with **Grundforløb 1 & 2**, then move into a contract with a company (praktik).

✓ Recommended if:

- You like hands-on work.
- You want to start working sooner.

- You're interested in trades or specific skilled professions.

How to Choose – Consider These Questions:

1. Do you want to go to university someday?

- Yes → STX, HTX, HHX, or HF.
- No / Not sure → Vocational path is still great and flexible.

2. What are you naturally good at or interested in?

- Science/Tech → HTX
- Languages/Humanities → STX
- Business/Economics → HHX
- Healthcare, cooking, mechanics, etc. → EUD

3. Do you learn best by reading and writing or doing things practically?

4. Do you want to work right after school or study longer?

Specific Advice for You:

You're fluent in Danish, born and raised in Denmark, and also have Jordanian roots. This multicultural background can be a strength in many fields:

- **International business (HHX)** – You understand multiple cultures, which is valuable in trade and communication.
- **Healthcare or social work (EUD or STX → university)** – Bilingual and multicultural professionals are in high demand in these areas.
- **IT or engineering (HTX)** – Denmark needs more skilled tech workers, and HTX can give you a strong start.

Personal Development Ideas:

Even beyond school, consider:

- Volunteering or summer jobs – they give you insight into work life.
- Talking to a **UU-vejleder (youth guidance counselor)** – They can guide you based on your specific interests.
- Keeping your Arabic skills – Being bilingual is a big advantage in many careers.

Would you like help figuring out which programs are available near where you live or creating a comparison of two or three paths you're most interested in?
