

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Liberia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and are thinking about what's next, that's a really important step. Your options depend on your interests, strengths, and long-term goals. Here's a breakdown of what you can consider — along with some tailored advice for someone in your position.

🎓 Main Educational Options After Primary School in Denmark

In Denmark, after 9th or 10th grade (which you've now finished), you generally choose between **three main paths**:

1. Gymnasium (STX, HHX, HTX, or HF) – Upper Secondary Education

This is a good option if you're thinking about going to university later.

- **STX** (Almen studentereksamen): General high school. Broad academic subjects like Danish, English, math, history, science.
- **HHX** (Handelsskolens studentereksamen): Focus on business, economics, and languages.
- **HTX** (Teknisk studentereksamen): Focus on science, technology, and IT.
- **HF** (Højere Forberedelseseksamen): A shorter (2-year) option, often for those who want a more practical academic route, sometimes with fewer subjects.

Recommended if:

You enjoy academic work, are considering university, and want to keep your options open.

2. Erhvervsuddannelse (EUD) – Vocational Education

This is for students who want to **learn a trade or profession** and maybe start working earlier (or later combine it with further education).

Examples:

- Electrician
- Carpenter
- Hairdresser
- Social and health care worker (SOSU)
- IT supporter
- Mechanic

You get a mix of **school education and paid internships** (praktik).

Recommended if:

You want to work with your hands, start earning earlier, or prefer more practical learning.

3. Kombineret ungdomsuddannelse (KUU), Produktionsskole or FGU – Preparatory Programs

If you're unsure, didn't get the grades you wanted, or need more support before moving forward, these help you build skills and confidence before moving to EUD or gymnasium.

Recommended if:

You need a little more time to decide or to improve your readiness for other education.

How to Choose? Ask Yourself:

1. **Do I enjoy schoolwork and want to go to university?**

- Yes → Gymnasium

2. **Do I prefer practical work, and want to start earning and working sooner?**

- Yes → EUD (Vocational education)

3. **Am I unsure, or need to build up my skills before deciding?**

- Yes → FGU or similar

You're Fluent in Danish and Have a Multicultural Background

That's a **huge strength**. Many employers and institutions value cultural awareness and language skills. You might consider:

- **Languages, global studies, or international business** (if you like people, cultures, or travel)
- **Healthcare or social work** (if you like helping others – especially in multicultural communities)
- **IT or engineering** (if you're curious about tech or building things – and there's high demand in Denmark)
- **Entrepreneurship or business** (especially with HHX if you dream of starting something)

Suggested Next Steps

1. **Visit an educational counselor** at your school or local **UU-vejleder (Ungdommens Uddannelsesvejledning)** – they help people just like you.
2. **Try a short internship** (praktik) or a “brobygning” course – a few days to try out vocational or gymnasium programs.
3. **Talk to people** who are a few years ahead of you – older friends, siblings, or community members.

Would you like me to suggest a specific path based on your interests?

If you tell me more about what you like (school subjects, hobbies, what you're good at), I can give you a

more personalized recommendation.
