

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Libya. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great – you're at an important and exciting point in your life. In Denmark, after completing **folkeskolen (primary/lower secondary school)**, you have several good options depending on your interests, goals, and strengths. Since you're 16, this is the right time to start thinking seriously about your **youth education (ungdomsuddannelse)**. Here are the main paths and some advice tailored to you:

♦ 1. General Upper Secondary Education (Gymnasiale uddannelser)

These are good if you're thinking about going to **university** later.

Options:

- **STX (Studentereksamen)** – Focus on general academic subjects like science, languages, history, and social studies.
- **HHX (Higher Commercial Examination Programme)** – Focus on business, economics, and marketing.
- **HTX (Higher Technical Examination Programme)** – Focus on technology, science, IT, and engineering.
- **HF (Higher Preparatory Examination)** – A 2-year academic program for those who maybe didn't do as well in 9th or 10th grade, or want a shorter option before university.

Recommended if:

- You enjoy academic subjects.
- You might want to go to **university** later.
- You're still exploring career paths.

♦ 2. Vocational Education and Training (EUD/erhvervsuddannelse)

These are good if you want to learn a **practical skill** and start working earlier or maybe become an apprentice.

Areas:

- Mechanics, electricians, carpentry
- Health and social care

- Hospitality, cooking
- Technology and digital development

Recommended if:

- You prefer **hands-on learning**.
- You want to earn a salary while training.
- You want to become a skilled worker, maybe even start your own business one day.

♦ 3. Kombineret Ungdomsuddannelse (KUU)

A special program if you're unsure or need extra support transitioning into education or work.

Recommended if:

- You're not sure what you want to do yet.
- You want to explore different jobs with support.
- You need help preparing for future education or training.

How to Decide:

Think about these questions:

- **What subjects do I enjoy most?**
- **Do I want to study at a university later, or do I want to work earlier?**
- **Am I more academic or more practical/hands-on?**
- **Do I like working with people, technology, nature, business...?**

Based on what you've shared:

Since you're fluent in Danish, born in Denmark, and have completed folkeskole, all these paths are open to you. Your **Libyan background** can also be a strength – if you speak Arabic or have cultural insight, it could be valuable in areas like international business, translation, healthcare, diplomacy, or social work.

If you're unsure, **STX or HF** is often a good general choice because it keeps doors open. But if you're more into hands-on or technical things, **HTX** or an **EUD** could be a better fit.

Would you like help exploring careers or making a plan?

I can:

- Suggest careers based on your interests
- Help you understand the steps to university
- Show you what EUD or gymnasium looks like in practice

Let me know what you're leaning toward, and I'll help you plan the next step!
