

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Liechtenstein. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great question – and it's really good that you're already thinking about your next step at 16. Since you've just completed primary school in Denmark, you have several solid educational paths ahead of you. The best one depends on your interests, strengths, and whether you're leaning more toward academics, practical skills, or something in between.

Here's a breakdown of your main options in Denmark and what they might mean for you:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university.

STX (Alment Gymnasium):

- Focus: Broad academic education (sciences, humanities, languages, etc.)
- Best for: If you enjoy school subjects and might want to go to university.

HTX (Teknisk Gymnasium):

- Focus: Science, technology, and engineering.
- Best for: If you're interested in tech, engineering, or innovation.

HHX (Handelsgymnasium):

- Focus: Business, economics, international trade.
- Best for: If you're interested in business, finance, or entrepreneurship.

HF (Højere Forberedelseseksamen):

- Shorter program (2 years instead of 3).
- More practical than STX.
- Good if you want flexibility or a quicker path to higher education.

2. EUD / EUX (Erhvervsuddannelser – Vocational Education and Training)

Focuses on hands-on skills and prepares you for a job or trade (but also offers pathways to higher education).

EUD:

- Direct path to becoming, for example, a carpenter, electrician, chef, or healthcare assistant.
- Combines school and apprenticeship.

EUX:

- Mix of vocational training and academic subjects (you get a studentereksamen + job skills).
- Ideal if you want to keep university as an option while learning a trade.

3. International/Alternative Options

Since your parents are from Liechtenstein and you speak Danish, you may be in a unique position to study in another country:

- **Germany, Switzerland, or Liechtenstein:** Might offer opportunities if you're interested in studying in German (if you speak it or are willing to learn).
- You could also look into **international high schools or IB programs** in Denmark or abroad, especially if you're academically inclined and might study or work internationally later.

How to Choose?

Here are some questions to help guide you:

1. **Do you enjoy academic subjects and want to go to university?**
→ STX, HTX, HHX, or HF
2. **Do you prefer learning by doing and want a job after 2-4 years?**
→ EUD or EUX
3. **Do you have a specific interest already (e.g. business, tech, healthcare)?**
→ Choose a gymnasium or vocational track that fits that field.
4. **Do you want to keep your options open for both work and study?**
→ EUX or a broad gymnasium like STX or HTX

My Recommendation (based on what you've told me):

Since you're fluent in Danish, finished Danish primary school, and didn't mention a strong preference yet, **I'd recommend looking into STX or EUX.**

- **STX** gives you flexibility and keeps all university options open.
- **EUX** is perfect if you're more hands-on but still want the chance to study further later.

Would you like help exploring specific schools or programs near where you live in Denmark? Or maybe you'd like to talk through your interests more to narrow it down?
