

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Malaysia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking carefully about your next steps at 16. In Denmark, after completing **primary/lower secondary school (folkeskolen)**, you generally have a few different paths to choose from depending on your interests, strengths, and future goals. Here's a breakdown of your main options and what might be a good fit based on different interests:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

This is typically a **3-year academic program** that prepares you for university.

Main types:

- **STX (Almen studentereksamen)** – broadest and most academic; includes humanities, social sciences, and natural sciences.
- **HHX (Højere handelseksamen)** – focused on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – focused on technology and natural sciences.
- **HF (Højere forberedelseseksamen)** – 2-year general program, often for those who want a quicker path to higher education or who took a non-traditional route.

Recommended if:

- You want to go to **university** in the future.
- You're interested in a wide academic foundation.
- You're still exploring your interests.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This is a mix of school and apprenticeship in a company.

Focus areas:

- Trades (e.g. electrician, carpenter, mechanic)
- Health and social care
- Hospitality, food, service
- IT and technology

Duration: 2–5 years depending on the path.

Recommended if:

- You want to **enter the workforce** more quickly.
- You prefer **practical, hands-on learning**.
- You have a clear idea of a trade or field you're passionate about.

3. EUX – Kombination af EUD og gymnasial eksamen

A hybrid option: combines vocational training with a high school diploma.

Recommended if:

- You want both **practical skills and academic qualifications**.
- You're ambitious and want flexibility: either work right away or go to university.

So, what should *you* consider?

Since you're fluent in Danish, born and raised in Denmark, and have now completed folkeskolen, here's what might help guide your decision:

Ask yourself:

- **Do I enjoy studying theory, reading, and writing?**
→ Consider **STX** or **HF**.
- **Am I more hands-on and like learning by doing?**
→ Consider **EUD** or **EUX**.
- **Do I like business, international relations, or marketing?**
→ **HHX** could be ideal (especially given your cultural background—you could bring unique perspectives).
- **Do I enjoy science, technology, or engineering?**
→ **HTX** might be a good fit.

Bonus: Cultural Background

Being of Malaysian heritage can be a strength:

- If you're bilingual (e.g. speak Malay, Chinese, or Tamil), that's a big plus in global careers.
- You could consider international programs later on (like IB or university abroad) if that interests you.

Final Advice

If you're still unsure:

- **Talk to a vejleder (guidance counselor)** at your school or UU-vejledningen (Ungdommens Uddannelsesvejledning).
- **Visit schools** during their open house events.

- **Do internships (brobygning)** to test out different fields before committing.
