

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mexico. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—that helps a lot in giving you good advice. Since you're 16 and just finished primary school in Denmark, you're likely at a point where you're choosing between different secondary education options, such as **gymnasium (STX, HHX, HTX)**, **vocational education (EUD/Erhvervsuddannelse)**, or a **combination like EUX**.

Let me break down the main paths and suggest what might fit you best, depending on your interests and goals.

1. Gymnasium (STX, HHX, HTX) – Academic Focus

These are 3-year programs that prepare you for university. Good if you enjoy studying, want to keep your options open, or are not sure what you want to do yet.

- **STX (Almen studentereksamen):** Broad academic subjects (languages, history, science, etc.). Great if you like general subjects or are still figuring things out.
- **HHX (Handelsskolen):** Focus on business, economics, and marketing. Good if you're interested in business or want to work in a company.
- **HTX (Teknisk gymnasium):** Focus on science, technology, and engineering. Great if you're into IT, math, or tech.

Recommendation: If you like school and want a university path later, STX or HHX could be strong choices. If you like hands-on subjects or technology, HTX might fit you better.

2. EUD – Vocational Education (Erhvervsuddannelse)

This is great if you want to learn a trade and start working relatively soon. You combine school with apprenticeships.

You can become a:

- Electrician
- Mechanic
- Carpenter
- Hairdresser
- Chef
- Health care assistant
- ...and many more.

Recommendation: If you want to start earning sooner or work with your hands, and school wasn't your favorite thing, this is a solid path. There's high demand for skilled workers in Denmark.

3. EUX – Both Vocational and Academic

EUX combines vocational training **and** a studentereksamen-level education. It takes longer (usually 4–5 years), but you get the best of both worlds: you can work as a skilled tradesperson or go to university.

Recommendation: If you're ambitious, want job security, and want to keep your future options open, EUX is a strong choice.

4. International & Cultural Considerations

Since you have a Mexican background, you could also consider:

- Taking Spanish as a high-level subject (especially in STX or HHX)
- Exchange programs (many gymnasiums and business schools offer this)
- Careers that benefit from bilingual skills (like international business, translation, diplomacy, etc.)

Summary of What Might Work Best

Here are some examples based on common interests:

If you like...	Consider...
General academics or unsure about future	STX
Business, marketing, international trade	HHX
Science, IT, technology	HTX
Working with your hands, practical skills	EUD
Practical + academic + keeping doors open	EUX

Final Advice

- Think about what you **enjoy** and what kind of environment you thrive in (school-based, hands-on, structured, creative, etc.).
- Visit **open house events** at local schools.
- Talk to your **UU-vejleder (youth education advisor)** — they can give personalized guidance and help with applications.
- Don't worry if you don't have it all figured out yet. Denmark's system is flexible — you can switch paths if you change your mind later.

Would you like help narrowing down your options based on what subjects or careers interest you most?
