

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mongolia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking seriously about your next step. Since you just finished primary school (folkeskolen) in Denmark and you're 16, you're at a key decision point. In Denmark, there are several options for continuing education after 9th or 10th grade, and the best choice depends on your interests, goals, and strengths.

Here's a breakdown of your main options and how you might think about choosing:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for higher education (university).

Common types:

- **STX (Alment Gymnasium)** – Broad and academic; includes languages, sciences, social studies.
- **HHX (Handelsskolen)** – Business-focused; great if you're interested in economics, marketing, or entrepreneurship.
- **HTX (Teknisk Gymnasium)** – Science and tech-focused; good if you like engineering, biology, or IT.
- **HF (Højere Forberedelseseksamen)** – Shorter (2 years), more practical; often for those who didn't take 10th grade or want a more hands-on path to higher ed.

Choose this if:

You're interested in university later on, enjoy academic subjects, or are still figuring out your long-term career.

2. Erhvervsuddannelser (Vocational Education and Training / EUD)

This is job-oriented education, combining school with practical training and apprenticeship.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Healthcare assistant
- IT-supporter
- Chef

✅ Choose this if:

You like hands-on learning and want to start working or earning money earlier. Some programs also give access to videregående uddannelse (further education) later.

👛 3. Kombinerede forløb / EUX

EUX combines vocational training **with academic subjects**, giving you a studentereksamen (like STX) *and* a professional qualification.

✅ Choose this if:

You want the flexibility of both working in a skilled trade *and* the option to go to university later.

🕒 What To Think About

Ask yourself:

- Do I enjoy studying in a classroom setting?
- Am I more practical and hands-on?
- Do I want to go to university someday?
- What subjects interest me the most (math, languages, science, social studies)?
- Would I enjoy earning money and learning on the job?

🎯 Example Paths Based on Interest

Interest	Suggested Path
Science/Tech	HTX or STX with science track
Business	HHX or EUX Business
Working with hands	EUD (craft, tech, culinary, etc.)
Helping people	EUD Health or HF with social studies
Not sure yet	STX (broadest) or HF (shorter and flexible)

💬 Final Advice

You're in a good position—you're bilingual, culturally flexible, and fluent in Danish, which will help no matter what you choose. If you're still unsure, consider talking to a **UU-vejleder (educational counselor)** at your school or kommune. They can help match your interests to available programs nearby.

If you'd like, I can help you explore career ideas based on your interests and strengths. Just let me know more about what subjects you like, how you like to learn, and any future dreams you have.
