

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Netherlands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark and you're 16, you're at the typical age to move on to *ungdomsuddannelser* (youth education). In Denmark, you generally have **two main paths** to choose from after primary school (folkeskole):

🧠 1. Gymnasiale uddannelser (Academic Upper Secondary Education)

These are more academically focused and prepare you for university.

Main options:

- **STX (Almen studentereksamen):** Broad and general. Strong in humanities, natural sciences, and social sciences.
- **HHX (Højere handelseksamen):** Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, and engineering.
- **HF (Højere forberedelseseksamen):** Shorter (2 years), more flexible, often for those who want a practical path to higher education.

Good if you:

- Enjoy studying theory, reading, writing, and abstract thinking.
- Might want to go to university later (e.g., to study psychology, law, medicine, engineering, etc.).

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This is more practical and job-oriented.

Examples:

- Carpenter, electrician, chef, hairdresser, social and healthcare assistant, etc.
- Often includes **apprenticeships** (praktik) in real workplaces.

Good if you:

- Prefer hands-on learning.
- Want to start working earlier or want a practical trade.
- Still possible to move on to higher education later, though not as directly.

Extra Consideration: Your Dutch Background

If you're bilingual or have ties to the Netherlands, you could consider:

- Studying something with **international focus** (HHX, or STX with language and culture lines).
- Exploring **study abroad** opportunities later (e.g., in the Netherlands, using English or Dutch).
- Taking **Dutch as a second language**, if offered.

Recommendation Based on What You've Shared:

Since you're fluent in Danish, born in Denmark, and just finished primary school, I'd recommend:

- **STX** if you're unsure but want to keep all doors open, especially for university.
- **HHX** if you're curious about business or economics (good connection to the Netherlands and EU).
- **HTX** if you're interested in science, tech, or engineering.
- **EUD** if you learn best by doing and want to start working in a skilled trade early.

Would you like help picking between those based on your interests or future goals?
