

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nicaragua. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark, you're likely deciding between the main educational options available after **9th or 10th grade**. Here's a breakdown of your options and some recommendations based on your background and situation:

Main Educational Paths in Denmark After Primary School:

1. Gymnasium (STX, HHX, HTX) – General Upper Secondary Education

- **Duration:** 3 years
- **Goal:** Prepares you for university.
- **Types:**
 - **STX** – Focus on general subjects (languages, history, science)
 - **HHX** – Focus on business and economics
 - **HTX** – Focus on technology and natural sciences

2. EUX / EUD – Vocational Education and Training

- **EUX:** Combines vocational training with academic subjects – you get both a skilled trade and the right to study at university.
- **EUD:** More hands-on, for students who want to enter a trade (like electrician, carpenter, chef, etc.)
- **Duration:** 2–5 years depending on the program

3. International or Bilingual Programs

- If you have interest in global careers, English-speaking programs like the **International Baccalaureate (IB)** or bilingual STX might be a good option.

Based on Your Background

Since you're:

- **Fluent in Danish**
- **Bicultural (Danish-Nicaraguan)** 

- Just out of primary school

Here are **some questions and tailored advice**:

A. Are you more interested in academic or practical learning?

- If you enjoy **books, theory, discussions**, and maybe want to go to **university later**, consider:
 - **STX** (most general and flexible)
 - **IB** (if you're confident in English and want an international profile)
- If you like **working with your hands, learning through doing**, or want to **start working earlier**, then:
 - **EUD or EUX** could be excellent paths. **EUX** especially is great if you're ambitious and want both practical skills and university access later.

B. Do you already have a dream or interest?

- If you like **business or want to be an entrepreneur**, HHX is great.
- If you're into **science, technology, or engineering**, HTX is strong.
- If you don't know yet, STX keeps your options open.

✨ My Recommendation:

If you're unsure: STX or EUX

- **STX** is a safe, flexible option if you're still exploring your interests.
- **EUX** is ideal if you like doing things and want job skills *and* a way to go to university.

Final Tip:

Take a visit to some **educational fairs or open house events** ("åbent hus") at schools near you. Talk to counselors and students to feel the vibe. You can also talk to an "**UU-vejleder**" (**youth education counselor**) – they are trained to help students like you find the right path.

Would you like help choosing between STX, HHX, HTX, EUX, etc., based on your interests or strengths? I can help you narrow it down if you tell me what subjects or activities you enjoy.
