

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Norway. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background! Living in Denmark and having roots in Norway gives you a strong Nordic foundation—culturally and linguistically—which opens several good educational and career opportunities. Since you've just finished **primary school (folkeskole)** in Denmark, you're at the typical age and stage for choosing your **youth education** (ungdomsuddannelse).

Step 1: Know Your Main Options in Denmark

After primary school, Danish students usually choose between two main educational paths:

1. General Upper Secondary Education (Gymnasiale uddannelser)

If you're academically inclined or interested in continuing to university, this path is ideal.

Types:

- **STX (Almen studentereksamen):** Broadest academic path, with a mix of humanities, sciences, and social sciences.
- **HHX (Højere Handelseksamen):** Business- and economics-focused.
- **HTX (Højere Teknisk Eksamen):** Technology and science-heavy.
- **HF (Højere Forberedelseksamen):** A shorter, 2-year academic option, often used by older students or those needing a more flexible path.

Recommended if:

- You enjoy school subjects like math, languages, history, science, or business.
- You're considering **university studies** later.

2. Vocational Education and Training (Erhvervsuddannelse, EUD)

A practical path that prepares you for a specific trade or profession, often with paid internships (praktik).
Examples:

- Carpenter, electrician, chef, graphic designer, social- and health care assistant.

Recommended if:

- You enjoy hands-on work and want to **enter the job market** earlier.
- You want to possibly **start your own business** in a trade.
- You might still go to higher education via **EUX** (a hybrid of vocational training + academic subjects).

Bonus Option: Studies in Norway

Since you're a Norwegian citizen through your parents, you likely qualify for **tuition-free education** in Norway too.

You could consider:

- Going to **videregående skole** in Norway (Norwegian equivalent of gymnasium), especially if you're interested in reconnecting with your Norwegian roots.
- Eventually studying at a Norwegian university (very affordable, even for Danes).

How to Decide?

Here are some questions to ask yourself:

1. **What subjects do you enjoy most?**
2. **Do you prefer academic study or practical learning?**
3. **Do you want to go to university later?**
4. **Are you excited by the idea of starting a career early, or do you want more time to explore?**

★ Recommendation Summary (Based on Your Profile)

Since you're fluent in Danish, born and raised in Denmark, and just finished folkeskole:

- **If you enjoy academic subjects** and want the option to attend university later → **STX** is the most flexible and common path.
- **If you're more hands-on or career-focused** → consider **EUD** or **EUX**.
- **If you're curious about your Norwegian side** and open to adventure → exploring **videregående skole** in Norway could be very cool and culturally enriching.

If you want, I can help you create a list of pros and cons based on your interests or even suggest specific schools in your area. Would you like that?
