

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Oman. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — you're at an exciting point in your life. In Denmark, after finishing primary school (folkeskole), you have several good options for continuing your education. The best path depends on your interests, strengths, and future goals. Here's a clear overview of your main options:

1. Gymnasium (General Upper Secondary Education)

If you like academic subjects and are thinking about university in the future, this is likely your best path.

Options:

- **STX:** General upper secondary school (focus on science, language, and social science).
- **HHX:** Business-oriented (great if you like economics, marketing, or international trade).
- **HTX:** Technical and science-oriented (good for tech, engineering, or IT interests).
- **HF:** A 2-year version of gymnasium (often for slightly older students or those wanting a shorter route).

Why choose gymnasium?

- Opens the door to universities and higher education.
- Keeps your options open if you're still unsure about your future.

2. Erhvervsuddannelse (Vocational Education and Training - VET)

If you like practical, hands-on work (like building, cooking, caring for others, tech, etc.), this is a strong choice.

Examples:

- Electrician
- Carpenter
- Hairdresser
- IT Supporter
- Healthcare assistant
- Chef

Why choose VET?

- You earn money while learning (through apprenticeships).
 - You get into the job market faster.
 - It's possible to later take a "eux" version, which combines VET with qualifications for higher education.
-

3. EUX – The Best of Both Worlds

This combines vocational training with a gymnasium-level education. It's harder and takes longer, but gives you both a skilled trade *and* access to higher education.

Other Considerations (Based on Your Background)

- You might have cultural or language strengths from your Omani background — these could be useful in international business, diplomacy, language education, or multicultural social work.
 - If you're interested in **languages, culture, or international relations**, STX with language focus or HHX with international economics could be a great fit.
-

What to Ask Yourself:

- Do I enjoy academic subjects or practical work more?
 - Do I want to go to university, or start working sooner?
 - Am I interested in business, science, healthcare, tech, or the arts?
-

Final Thoughts and Recommendations:

If you're still figuring things out but want to keep doors open, **STX or HHX** is a solid start. If you already have a clear interest in something like tech, building, or care work, consider **VET** or **EUX**.

Would you like help narrowing down your options based on your interests or favorite school subjects?
