

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Palau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — it's great that you're thinking about your next step after primary school. In Denmark, you have several solid options depending on your interests, strengths, and career goals. Here's a breakdown to help you decide:

1. General Upper Secondary Education (Gymnasiale uddannelser)

Best if you want to keep many doors open (university, professions like law, medicine, engineering, etc.)

Options:

- **STX (Almen studentereksamen):** Broad academic focus with subjects like humanities, science, and social studies.
- **HHX (Højere handelseksamen):** Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen):** Focus on technology, science, and innovation.
- **HF (Højere forberedelseksamen):** A 2-year program, slightly more practice-oriented, often for students who prefer a different learning style.

→ Recommendation:

If you're not sure what you want yet and enjoy school subjects like science, history, languages, or business — **STX** or **HHX** is a good starting point.

2. Vocational Education and Training (Erhvervsuddannelser / EUD)

Best if you prefer hands-on learning and want to start working sooner.

You train for specific jobs like:

- Electrician
- Carpenter
- Health care assistant

- Mechanic
- Chef

Many programs include paid internships (læreplads), and you can even go on to higher education afterward with **EUX**, which combines vocational training with general subjects.

→ Recommendation:

If you like practical work or want to start earning sooner, look into EUD or EUX. These are respected paths with real job opportunities.

Tips to Decide:

- **Do you like studying and writing papers?** → Go for STX/HHX/HTX.
- **Do you prefer doing things with your hands or learning by doing?** → Consider EUD/EUX.
- **Do you want to go to university later?** → STX, HHX, or HTX are best.
- **Are you interested in starting a business one day?** → HHX gives a good foundation.
- **Do you enjoy science and technology?** → HTX could be perfect.

Bonus: International Possibilities

Since you have roots in Palau and are fluent in Danish, you may also want to explore opportunities for international education or exchange later on. Gymnasium tracks (especially STX and HHX) can prepare you well for study abroad programs.

Would you like help figuring out which subjects or careers you're most interested in? I can guide you through a short set of questions if you'd like.
