

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Paraguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question — and it's really good you're thinking about this now. In Denmark, there are several strong educational options after primary school (folkeskole), and the right path depends on your interests, strengths, and long-term goals. Here's a breakdown of your main options, and what might suit you:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are the most common paths if you're interested in university later:

STX (Studentereksamen)

- **Focus:** Broad academic subjects (languages, humanities, sciences).
- **Best for:** Students who enjoy academic learning and want a lot of options later.
- **Length:** 3 years.

HHX (Higher Commercial Examination)

- **Focus:** Business, economics, international trade.
- **Best for:** Students interested in finance, business, or marketing.
- **Length:** 3 years.

HTX (Higher Technical Examination)

- **Focus:** Science, technology, engineering.
- **Best for:** Students who like math, tech, and applied science.
- **Length:** 3 years.

HF (Higher Preparatory Examination)

- **Focus:** More practical/shorter than STX. Good if you didn't get high grades but still want access to higher education.
- **Length:** 2 years (after 10th grade or 1 year after 9th).

🔧 2. Erhvervsuddannelser (Vocational Education and Training / EUD)

- **Focus:** Learn a trade (e.g., electrician, carpenter, hairdresser, chef, mechanic).
- **Best for:** Students who prefer hands-on work and want to start earning sooner.
- **Includes:** Both school and apprenticeship.
- **Length:** 2-5 years depending on the program.

3. 10. klasse

- A good option if you're unsure what to do next.
- Helps you mature, improve skills, and explore different interests.
- Often includes internships, career guidance, and project-based learning.

Based on Your Background

Given that you're fluent in Danish, born and raised here, and you've just finished primary school:

- If you enjoy studying and are curious about many topics, **STX** is the most flexible and opens many doors.
- If you're interested in international business or want to link Denmark and Paraguay through trade or economy, **HHX** might be a great fit.
- If you love tech, science, or engineering, **HTX** will give you strong skills and career options.
- If you're unsure, **10. klasse** is totally valid — lots of students take that extra year to figure out what fits them best.

Future Possibilities

Your heritage from Paraguay is a real strength. Being bicultural and bilingual (if you speak Spanish or Guaraní too) can be valuable in careers like:

- **International business**
- **Diplomacy or NGO work**
- **Tourism and hospitality**
- **Language teaching**
- **Import/export trade**

My Recommendation

If you're motivated academically and want to keep your options open:

→ **Go for STX or HHX**, depending on whether you prefer general subjects or business.

If you feel unsure and want more time:

→ **Take 10th grade**, ideally at a school that offers career guidance and maybe a boarding (efterskole) experience.

If you're ready to work with your hands and want a faster path to a job:

→ **Choose a vocational education (EUD).**

If you want, I can help you compare specific schools or find one near where you live in Denmark. Just let me know!
