

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Russian Federation. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question—and it's excellent that you're thinking carefully about your next steps. In Denmark, after finishing primary school (folkeskole), you generally have a few main educational paths to choose from. The best path depends on your interests, strengths, and goals for the future.

Here's a quick overview of your main options:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education – General)

These are aimed at students who want to go to university later.

- **STX (Alment Gymnasium)** – Focuses on general education: humanities, sciences, social sciences. It's the most flexible and widely chosen.
- **HHX (Higher Commercial Examination Programme)** – Focuses on business, economics, and marketing.
- **HTX (Higher Technical Examination Programme)** – Focuses on science, technology, and innovation.
- **HF (Higher Preparatory Examination)** – A 2-year alternative that's more focused and often used by older students or those who want to enter certain higher education programs.

Best if: You're considering university and want broad academic options.

🔧 2. Erhvervsuddannelse (Vocational Education and Training – EUD)

This combines school and apprenticeship (praktik) and leads to skilled professions.

- Fields include: electrician, carpenter, chef, mechanic, social and health care, IT, and many others.
- Usually takes 3–5 years depending on the field and includes both school and real work experience.

Best if: You prefer hands-on work, want to earn while you learn, and are interested in a skilled trade or profession.

💡 3. EUX (Vocational + Academic Combo)

This path combines a vocational education with a gymnasial-level education, so you can work or go to university afterwards.

Best if: You want the best of both worlds—practical skills and the option to study further.

✨ My Recommendation

Since you're fluent in Danish, have finished primary school in Denmark, and if you're open to both academic and practical options, here's a possible recommendation:

Option A: STX or HHX if:

- You like studying theory (languages, science, social studies, economics).
- You're considering university in the future.
- You're not yet sure exactly what career you want.

Option B: EUX if:

- You want practical work experience but also want the option to attend university.
- You're interested in specific trades (e.g., IT, business, technology).

Option C: EUD if:

- You know you want a skilled job sooner.
- You're more motivated by real work than schoolwork.

Bonus Tips

- Talk to a **UU-vejleder** (Youth Guidance Counselor) – they can help you choose the right path based on your interests and talents.
- Try attending **introductory courses** (brobygning) at different schools to see what feels right.
- If you have interests in areas like technology, languages (including Russian), or global relations, that could help guide your decision too.

Would you like to tell me more about your interests or subjects you enjoy? That would help me tailor the recommendation even more closely to you.
