

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sao Tome and Principe. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great point in your life to start thinking seriously about your future. Since you've just finished primary school (in Denmark, that usually means 9th or 10th grade), your next step is to choose a **youth education** path. Denmark offers several options, and the best one for you depends on your interests, goals, and the kind of life you want to build. Here's a clear overview to help you decide:

♦ 1. General Upper Secondary Education (Gymnasiale Uddannelser)

This is the academic path, preparing you for university.

Options:

- **STX (Studentereksamen):** Broad focus with subjects like Danish, history, science, languages.
- **HHX (Higher Commercial Examination):** Focus on business, marketing, and economics.
- **HTX (Higher Technical Examination):** Focus on science, technology, IT, and innovation.
- **HF (Higher Preparatory Examination):** Shorter (2 years), more practical, also prepares for higher education.

Recommended if:

- You enjoy academic subjects.
- You think you might want to go to university.
- You're unsure and want to keep doors open.

♦ 2. Vocational Education and Training (Erhvervsuddannelse - EUD)

A more practical path, combining school and internships with companies.

Fields:

- Health and social care
- Technology and IT

- Mechanics, construction, plumbing, etc.
- Business and administration
- Hairdressing, cooking, and more

Recommended if:

- You like hands-on work.
- You want to start working sooner and earn money during education.
- You're interested in a trade or technical field.

◆ 3. Combined Youth Education (FGU - Forberedende Grunduddannelse)

For students who need more preparation before moving on to a vocational or upper secondary education.

Recommended if:

- You're unsure what to choose.
- You need more support or time to develop academically or socially.

How to Choose?

Ask yourself:

- **What subjects do I enjoy most?**
- **Do I like theory or practice more?**
- **Do I want to go to university?**
- **Do I want to start working soon?**

My Recommendation (based on what you've said):

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school:

- **If you're academically strong and open to university later:** Go for **STX or HHX** (especially HHX if you like business/economics).
- **If you like practical work and want to earn sooner:** Consider **EUD** in an area that interests you (e.g. IT, mechanics, social care).
- **If you're unsure or didn't do so well in primary school:** **FGU** might be a great stepping stone.

If you tell me more about your interests (e.g., are you more into tech, helping people, creating things, or managing?), I can make a more tailored suggestion.
