

Uddannelsesmuligheder efter Folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Seychelles. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big and exciting decision—well done on finishing primary school! In Denmark, after completing **primary/lower secondary education (Folkeskole)**, you have several good options depending on your interests, strengths, and future goals. Since you're 16 and fluent in Danish, all options are open to you.

Here's a breakdown of your main **educational paths** after primary school:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are 3-year programs that prepare you for university:

- **STX (Studentereksamen):** Broad and academic. Good if you're interested in subjects like science, humanities, or social studies.
- **HHX (Higher Commercial Exam):** Focus on business, economics, marketing, and languages.
- **HTX (Higher Technical Exam):** Focus on science, technology, IT, and design.
- **HF (Higher Preparatory Exam):** A shorter 2-year version, often for adults or those who want a more flexible path.

Recommended if you're interested in academic subjects and might want to go to university.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and apprenticeship (praktik), leading to skilled trades (e.g., carpenter, chef, mechanic, hairdresser, IT supporter).

- You can earn while you learn.
- Shorter duration (2–5 years depending on program and specialization).
- Some programs can lead to higher education later.

Recommended if you want to work with your hands, learn a profession, and maybe start earning sooner.

3. EUX – The Best of Both Worlds

A mix of vocational training and general education. You get a studentereksamen **and** a vocational qualification.

- Longer (4–5 years), but gives you both practical and academic options.
- Can go directly to a job **or** higher education.

Recommended if you want to keep both doors open – job and university.

4. Other Paths

- **10th grade (10. klasse):** Optional extra year after primary school to mature academically or personally.
 - **International schools or programs** (like IB): Could be good if you're interested in an international career.
 - **Folk high schools (højskole):** Not formal education, but can be great for exploring interests.
-

My Recommendation (Based on Your Background):

Since you're fluent in Danish, born in Denmark, and just finishing school at the regular age, here's a tailored suggestion:

1. **If you're unsure what you want yet** → Consider **10th grade** to explore your options.
 2. **If you like academic subjects and might want university later** → **STX or HHX** (if you like business).
 3. **If you're more hands-on or want to start working sooner** → **EUD or EUX** (especially if you're interested in tech, culinary, trades, etc.).
 4. **If you're very ambitious and want all options open** → **EUX** is a solid choice.
-

Would you like to tell me what subjects or activities you enjoy most? That can help narrow the options even better.
