

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sierra Leone. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16 and have just finished **primary school** in Denmark (which might actually mean **Folkeskole**, up to 9th or 10th grade), you're now at an important point in your life where you can choose between several educational paths.

Here's a breakdown of your **main options** in the Danish education system, followed by a few personalized recommendations based on your background:

## Main Educational Paths After Folkeskole (9th/10th grade)

### 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are aimed at preparing students for university.

- **STX (Studentereksamen)** – Broad general education (humanities, natural science, and social science).
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and marketing.
- **HTX (Higher Technical Examination)** – Focus on science and technology.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more flexible, for students who want a less academic environment.

### 2. Erhvervsuddannelser (Vocational Education and Training - EUD/EGU)

These combine school with work experience and lead directly to a skilled trade or job.

- Examples: Electrician, carpenter, hairdresser, social and health worker (SOSU), IT support, etc.
- You can still continue to university through **EUX**, which combines vocational training with academic classes.

### 3. 10th Grade (10. klasse)

If you don't feel ready for upper secondary yet, 10th grade can give you more time to mature and improve skills.

## Things to Think About

- Do you enjoy academic schoolwork or more hands-on learning?
- Are you already interested in a career area (e.g., business, healthcare, tech, art, trades)?
- Do you want to go to university later, or start working sooner?
- Do you want a more creative, technical, or people-focused job?

## Personalized Suggestions for You

Since you're fluent in Danish and grew up in Denmark but also have roots in Sierra Leone, you bring a **multicultural perspective**—that can be a strength in many careers (like teaching, healthcare, diplomacy, tech, and business).

Here are **three example paths**, depending on your interests:

---

### If you like science, tech, or engineering:

- **HTX** (technical gymnasium) is a great choice.
  - Focuses on subjects like biology, technology, physics, and innovation.
  - Prepares you for technical university or tech careers.
- 

### If you're interested in business, economics, or leadership:

- **HHX** gives you a good base in international trade, marketing, and economics.
  - Useful if you want to start your own business or work in finance or sales.
- 

### If you're more practical or want to start working sooner:

- **EUD/EUX** lets you become a skilled worker in 3–4 years.
  - **EUX** is especially smart if you want to keep the door open to university.
  - Fields like IT-supporter, SOSU-assistant, or electrician are in high demand and well-paid in Denmark.
- 

### Final Advice

- **Visit education fairs (uddannelsesmesser)** and talk to school advisors.
  - Ask your current teachers or a **UU-vejleder** (youth guidance counselor) for guidance.
  - Consider your **strengths**, not just your grades. What makes you feel confident and motivated?
- 

If you tell me more about your **interests**, **favorite subjects**, or what kind of life you imagine in the future, I can give even more targeted suggestions.
