

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Slovenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's good that you're thinking carefully about your next step. In Denmark, after completing **primary school (folkeskolen)**, you generally have a few main options depending on your interests, strengths, and career goals. Here's a clear overview to help guide your decision:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are more academically focused and prepare you for university.

A. STX (Studentereksamen)

- General upper secondary education.
- Wide range of subjects: science, humanities, languages, social studies.
- Good if you're unsure yet but want to keep university options open.
- Duration: 3 years.

B. HHX (Higher Commercial Examination)

- Focus on business, economics, marketing, and international trade.
- Good if you're interested in business or want to study business/economics later.
- Duration: 3 years.

C. HTX (Higher Technical Examination)

- Focus on technology, science, and innovation.
- Great if you enjoy math, physics, IT, or engineering.
- Duration: 3 years.

D. HF (Higher Preparatory Examination)

- More compact (2 years), often used by those who are a bit older or need a second chance.
- Often chosen by people who want to pursue social, health, or teaching professions.

2. Erhvervsuddannelser (Vocational Education and Training - VET)

- You combine school with hands-on work experience (apprenticeship).
- Leads to a skilled profession (plumber, chef, carpenter, mechanic, etc.).
- Good if you prefer practical work or want to start working sooner.
- Duration: Usually 3–4 years.

Bonus: You can combine this with EUX if you want both a trade and the possibility of university later.

Which Path Might Fit You?

Ask yourself:

- Do I enjoy academic work or hands-on tasks more?
- Do I want to go to university, or would I rather work earlier?
- What subjects excite me: science, business, humanities, tech, or hands-on trades?

Extra Consideration: Your Slovenian Roots

Being bilingual or bicultural can be a strength:

- If you're interested in international studies, diplomacy, or language, **STX with language focus** or **HHX with international business** might suit you.
- You might also explore **exchange programs** or schools with international tracks.

My Recommendations Based on Your Background

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school, all paths are open to you. Here's what I'd suggest, depending on your interest:

If you like...	Consider...
General academic subjects	STX
Business and trade	HHX
Technology, science, IT	HTX
Helping others, healthcare	HF
Working hands-on	VET (EUD) or EUX

If you're unsure, **STX is a safe and broad option** that keeps doors open.

If you tell me a bit more about your interests, favorite subjects, or dream job (if you have one), I can give even more specific advice.
