

Uddannelsesvejledning for 16-årig

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from South Africa. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background — that's really helpful. Since you're 16 and have just completed **primary school** in Denmark (which usually ends around age 15-16), you're likely transitioning to what Denmark calls "**ungdomsuddannelse**" — youth education. Your options depend on your interests, strengths, and future goals. Here's a breakdown to help guide your decision:

♦ Main Education Paths After Primary School in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

- **Examples:** STX (Almen gymnasium), HHX (Business-oriented), HTX (Technical), HF (Shorter general program)
- **Best for:** Students who want to go to **university** later.
- **Duration:** 2–3 years
- **Strong choice if:**
 - You enjoy academic subjects (like languages, science, history, or economics).
 - You're considering a university education in the future (in Denmark or abroad).

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- **Best for:** Students who want to learn a trade or start working soon.
- **Examples:** Carpenter, electrician, hairdresser, chef, social and health care worker (SOSU), etc.
- **Structure:** Combines school + apprenticeship.
- **Strong choice if:**
 - You like learning by doing.
 - You're interested in entering the workforce earlier or continuing as a skilled worker.

3. Kombinerede forløb (EUX)

- **Hybrid path:** Combines vocational training with academic studies.
- **Gives you** both a studentereksamen (like STX) and a trade qualification.
- **Strong choice if:**
 - You want practical skills + the option to go to university later.

◆ Things to Ask Yourself

- Do I enjoy studying theoretical subjects?
 - Do I want to go to university someday?
 - Do I like working with my hands, being active, or solving practical problems?
 - Am I interested in business, science, technology, art, healthcare?
-

◆ Personal Suggestions (Based on What You've Shared)

Since you're fluent in Danish and have multicultural roots (Denmark + South Africa), you might have unique strengths like language, communication, and cultural understanding. That could be great for paths like:

- **STX with languages/social sciences** (opens up international studies later)
 - **HHX** if you're into **business or entrepreneurship**
 - **EUX Business or Technical** if you want both practical skills and university options
 - **STX or HF** if you're not sure yet and want to keep your doors open
-

◆ What You Could Do Next

1. **Visit a UU-vejleder** (Educational guidance counselor) at your old school or a UU center. They help 15–17-year-olds with choosing education paths.
 2. **Look into open house events** at local gymnasiums or vocational schools — it's a great way to see what feels right.
 3. **Try an "Brobygning"** (introductory program) — you can test out different educations before committing.
-

If you tell me more about your interests — like whether you prefer science, art, working with people, technology, or other areas — I can give you even more tailored advice!
