

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sri Lanka. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's good that you're thinking ahead! In Denmark, after finishing **primary school (folkeskole)**, you generally have a few solid educational paths to choose from. Which one is best for you depends on your interests, strengths, and long-term goals. I'll outline the main options and give some recommendations based on different types of interests.

Main Educational Paths After 9th or 10th Grade in Denmark

1. Gymnasiale uddannelser (Upper Secondary Education – Academic)

These are suited if you're interested in continuing to university later.

- **STX (Studentereksamen):** Broad academic focus (humanities, science, social science).
- **HHX (Højere Handelseksamen):** Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen):** Focus on technology, science, and IT.
- **HF (Højere Forberedelseksamen):** Shorter, more practical – often for older students or those wanting a faster route to vocational education or certain university programs.

🔴 **Recommended if:** You enjoy academic subjects and think you may want to go to university someday.

2. EUD (Erhvervsuddannelse – Vocational Education and Training)

This is a more practical path, combining school and apprenticeship.

- Examples: Electrician, carpenter, hairdresser, chef, social and healthcare assistant, etc.
- Can lead to a skilled job directly or even to further education (like **EUX**, which combines EUD and academic courses).

🔴 **Recommended if:** You want to work with your hands, get a job sooner, or prefer learning-by-doing.

3. EUX (Kombineret Erhvervsuddannelse og Gymnasial Eksamen)

Combines vocational training with a gymnasial-level exam.

- Gives you a skilled trade **and** the option to go to university.

🔴 **Recommended if:** You want the best of both worlds – practical skills **and** academic qualifications.

Choosing Based on Your Interests

Interest Area	Suggested Path
University studies (any)	STX or HF
Business/marketing	HHX
Technology/engineering	HTX or EUX (technical focus)
Healthcare or social work	HF or EUD (social & health), possibly EUX
Trades (e.g., electrician, chef, etc.)	EUD or EUX
Wanting to work sooner	EUD or EUX

Other Things to Consider

- **Language fluency:** You're fluent in Danish, which is great – it means you have full access to all these options.
- **Cultural background:** Growing up in a multicultural home might give you an edge in fields like international business, healthcare, or social work.
- **Support:** Don't hesitate to talk to an **educational advisor (UU-vejleder)** at your school or kommune – they can help tailor advice to your specific goals and grades.

My Personal Advice

If you're still unsure what you want long-term, **STX** or **EUX** are often good choices. They keep your options open – both for university and for practical careers.

But if you already know you love working with people, building things, or a specific trade, a **vocational program (EUD or EUX)** could get you on the path to a fulfilling career faster.

If you tell me more about what subjects or careers interest you, I can help you narrow it down even more!
