

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16 and just finished primary school in Denmark, you're at a key point in your education where you can shape your future based on your interests, strengths, and goals. Denmark offers several good options for students like you. Here's a breakdown of the main paths you can consider:

1. Gymnasiale uddannelser (Upper Secondary Education)

If you're interested in going to university later, this is the most common path.

Main types:

- **STX (Studentereksamen):** Broad academic focus. Great if you're not sure what you want to study later or like subjects like Danish, English, history, science.
- **HHX (Højere Handelseksamen):** Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen):** Focus on technology, science, and IT.
- **HF (Højere Forberedelseksamen):** A shorter, more practice-oriented 2-year course (often taken a bit later).

Why choose this path?

- You want to go to university later.
- You enjoy academic subjects.
- You like learning in a classroom setting.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This is a hands-on education where you combine school with real work experience in a company.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Mechanic

- Social and healthcare assistant (SOSU)
- IT support

Why choose this path?

- You want to work with your hands or learn a specific trade.
 - You want to start working sooner.
 - You like learning by doing.
-

3. EUX – A Mix of Vocational Training and Gymnasium

This is a combination of EUD and a gymnasial exam. You become a skilled worker **and** get qualifications to enter university.

Why choose EUX?

- You want both practical skills and the option to study further.
 - You're ambitious and not afraid of a heavy workload.
-

How to Decide?

Ask yourself these questions:

- Do I prefer academic work or practical tasks?
 - Do I want to go to university or start working sooner?
 - What subjects or activities do I enjoy most?
 - Do I want to help people, build things, create, solve problems?
-

Next Steps

1. **Talk to your school counselor (UU-vejleder)** – they know the local options and can help you make a plan.
 2. **Visit educational fairs or open house events** (Åbent Hus) to see what the different paths feel like.
 3. **Talk to people** who work in jobs you find interesting – family, friends, community.
 4. **Consider internships** (praktik) or short work experiences to try out your interests.
-

If you tell me more about what subjects you like, hobbies you enjoy, or career dreams you have, I can give you a more specific recommendation!
