

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sweden. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about your background — that's really helpful. Since you just finished primary school in Denmark and you're 16, your next step would usually be some kind of **youth education (ungdomsuddannelse)**. Denmark offers several main paths after primary school, and the right one for you depends on your interests, skills, and future goals. Here are the main options:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academically focused and prepare you for university.

Options include:

- **STX (Almen studentereksamen)** – general upper secondary school. Broad focus including humanities, sciences, and languages.
- **HHX (Højere handelseksamen)** – focused on business, economics, and languages.
- **HTX (Højere teknisk eksamen)** – focused on science, technology, and engineering.
- **HF (Højere forberedelseeksamen)** – a 2-year general education program, often chosen by students who want a shorter path or had a non-traditional school experience.

Recommended if: You want to keep your options open for university or enjoy academic learning.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

Combines school and apprenticeship in a trade or profession.

Examples:

- Electrician, carpenter, hairdresser, chef, IT-supporter, etc.

You can also do **EUX**, which combines vocational training with general education — so you get both a trade and the possibility to go to university later.

Recommended if: You enjoy practical work, want to start working sooner, or want a more hands-on learning style.

3. International or Cross-Border Options

Since your parents are Swedish, you may also have the option to study in Sweden. The systems are different but compatible. If you're curious about moving to Sweden for **gymnasium**, that could also be a path — especially if you have family there.

Recommended if: You're interested in connecting with your Swedish roots or exploring cross-border education.

How to decide?

Here are a few questions to help you narrow it down:

- Do you enjoy academic subjects and studying for exams?
 - Are you more practical and hands-on in your learning?
 - Do you already have a dream job in mind (doctor, engineer, carpenter, designer)?
 - Do you want to work right after school, or go to university later?
-

Recommendation (based on what you've said so far)

Since you're fluent in Danish, grew up in Denmark, and just finished primary school, I'd recommend:

- **STX or HHX** if you enjoy school and are thinking about university.
- **EUX** if you like hands-on learning but still want to keep your academic options open.
- **Look into Swedish gymnasium** if you want to explore education in Sweden and you're fluent in Swedish.

Would you like help comparing specific schools or programs near where you live?
