

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Tajikistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that—it's great that you're thinking about your future already. Since you've just finished primary school in Denmark, you're probably around the point where you're choosing between different **youth education options** (ungdomsuddannelser). In Denmark, you generally have a few main paths to choose from after primary school:

🎓 1. General Upper Secondary Education (Gymnasiale uddannelser)

This path prepares you for **higher education** at universities or business schools.

- **STX** (Almen studentereksamen): Broad, academic – includes humanities, science, and social science.
- **HHX** (Handelsskolens studentereksamen): Focuses on business, economics, and languages.
- **HTX** (Teknisk studentereksamen): Focuses on science, tech, and innovation.
- **HF** (Højere Forberedelseseksamen): Shorter (2 years), more practical, and aimed at adults or students wanting a quicker path to higher ed.

✅ **Good if** you enjoy academic subjects and want to go to university in the future.

❌ **Not ideal** if you prefer hands-on or practical learning.

🔧 2. Vocational Education and Training (EUD/Erhvervsuddannelse)

Leads directly to a skilled job (e.g. electrician, mechanic, chef, healthcare worker).

- Often a mix of school and apprenticeship (praktik).
- Some tracks allow you to continue to university-level programs (via **EUX**).

✅ **Good if** you like working with your hands, want a job after 4 years, or want to earn money during training.

❌ **Not ideal** if you're unsure what career you want yet.

💡 3. EUX – Combination of vocational and academic

This is a hybrid path: you get a **skilled trade education** (like EUD) **plus** a **studentereksamen** so you can still go to university.

✓ **Good** if you want both practical skills and the option to study later.

✗ **Challenging** – it's more demanding than a normal EUD.

📌 Recommendations Based on Your Situation:

Because you're fluent in Danish, born and raised in Denmark, and just finished primary school, you're in a great position to choose any of these paths.

Here's what I'd suggest thinking about:

- **Do you enjoy academic learning?** → Consider **STX**, **HHX**, or **HTX**.
- **Are you more practical, or want to start working earlier?** → Look at **EUD** or **EUX**.
- **Are you interested in business or tech?** → **HHX** or **HTX** might suit you.
- **Are you unsure and want to keep your options open?** → **STX** is the broadest and safest choice for university.

👣 Next Steps

1. **Visit open house events** at local gymnasier and vocational schools (they usually offer visits in January–March).
2. **Talk to an educational advisor (UU-vejleder)** – they help you match your interests to the right path.
3. **Try a bridge course (brobygning)** – it lets you test out a few programs before you decide.

If you tell me more about your **interests** (like subjects you enjoy, what kind of career you might want), I can give you a more tailored recommendation.
