

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Trinidad and Tobago. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that—you're at a big turning point in your life, and it's great you're thinking carefully about your next steps. Since you've just finished primary school in Denmark (which usually means you've completed **9th grade**), your main options now include:

1. Continue in the Danish Education System

Here are the main educational paths after primary school in Denmark:

A. Gymnasiale uddannelser (General Upper Secondary Education)

These are 2–3-year programs that prepare you for university. Good if you're not yet sure what you want to do, or if you're interested in more academic studies.

- **STX (Studentereksamen)** – Broadest option with science, language, social science.
- **HHX (Higher Commercial Examination)** – Focuses on business, economics, and international relations.
- **HTX (Higher Technical Examination)** – Focuses on technology, science, and math.
- **HF (Higher Preparatory Examination)** – 2 years; more flexible, often for students who want a shorter path to university or vocational education.

✓ *Recommended if:* You're considering university or want to keep your options open.

B. EUD / EUX (Vocational Education and Training)

- **EUD (Erhvervsuddannelse)** – Prepares you for a trade or profession (e.g., carpenter, chef, mechanic, hairdresser).
- **EUX** – A combination of vocational training *and* general education that allows you to get a trade and still qualify for university.

✓ *Recommended if:* You want practical skills, to start working sooner, or combine work and studies.

2. International Perspective

Since your parents are from **Trinidad and Tobago**, you might have an interest in international culture, business, or travel. That could influence your path.

- **HHX** could be great if you're interested in international business or want a career that could take you abroad.
- **STX** with language and social science focus could prepare you for a future in global studies, law, or diplomacy.

If you're really internationally-minded, some schools in Denmark offer the **International Baccalaureate (IB)**. It's in English and accepted globally.

✓ *Recommended if:* You want to study or work internationally, or possibly study in another country later.

My Advice Based on What You Shared:

Since you're fluent in Danish and likely bicultural (Danish + Trinidadian background), you have a unique perspective. Here's a step-by-step recommendation:

1. **Think about your interests** – Do you enjoy science, languages, business, working with your hands, helping people?
 2. **Try to visit schools** – Attend open houses at gymnasiums or vocational schools to feel the environment.
 3. **Talk to a guidance counselor (UU-vejleder)** – They're available to help students choose the right education after primary school.
 4. **Stay open** – You don't have to figure everything out now. You can always switch paths later.
-

If you tell me more about:

- What subjects you like/dislike,
- Whether you enjoy school or prefer hands-on activities,
- If you're thinking of university or want to work sooner,

...I can give a more tailored recommendation.
