

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United States. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you're fluent in Danish and have both Danish and American cultural backgrounds — that can open a lot of opportunities for you! Since you've just finished **primary school in Denmark**, your next steps would typically be one of the **youth education programs (ungdomsuddannelser)**. Here's a quick overview of your main options, followed by some tailored recommendations based on your international background and potential goals:

Your Main Options in Denmark After Primary School

1. Gymnasium (STX, HHX, HTX, or HF)

These are general upper secondary education programs lasting 2–3 years and are a gateway to university.

- **STX**: Focuses on general academic subjects (sciences, humanities, languages).
- **HHX**: Focuses on business, economics, marketing.
- **HTX**: Focuses on technology, science, and IT.
- **HF**: A 2-year program, often for more practical learners or if you want to enter mid-level higher education quickly.

2. EUD / EUX (Vocational Education & Training)

These are programs that combine school with apprenticeships in trades (e.g., carpentry, plumbing, cooking, etc.).

- **EUX** is more academic and allows you to qualify for higher education as well.

Personalized Suggestions Based on Your Background

If You're Academic and Want a Path to University (in Denmark, the US, or abroad):

- Go for **STX** (especially with English, social sciences, or science focus) or **HHX** (if you're into business and economics).
- Consider **IB (International Baccalaureate)** if it's available near you — it's internationally recognized and in English, which would suit your American roots.

If You Prefer Hands-On Learning or Want to Start Working Sooner:

- Look into **EUX** – it gives you a vocational skill *and* access to university later.
- Choose EUD if you're sure about working in a trade or practical field.

International Considerations

Since you have U.S. roots:

- **Studying abroad later** might be easier if you go through **STX or IB**, as they're more academic and internationally recognized.
- If you're interested in reconnecting with the U.S. education system, **studying IB** or preparing for **exchange programs** might help keep that door open.

Recommendation Summary

Based on what you've shared:

- If you enjoy studying and want broad opportunities: **STX or IB**.
- If you're business-oriented: **HHX**.
- If you love tech/science: **HTX**.
- If you're practical but still want academic options: **EUX**.
- If you're sure you want to enter a specific trade: **EUD**.
