

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Viet Nam. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that's really helpful. At 16 in Denmark, you're at an important turning point. Since you've just completed **primary/lower secondary school (folkeskole)**, your next step depends on your **interests, strengths, and future goals**. Here's a breakdown of your main options and some advice tailored to your situation:

🎓 1. Gymnasiale uddannelser (General upper secondary education)

These prepare you for **higher education** (e.g., university).

Main types:

- **STX (Studentereksamen)** – Broad focus: humanities, sciences, and social sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere Forberedelseseksamen)** – Shorter (2 years), more practical, often for students who want a quicker path to further education.

Best for you if:

You enjoy academic subjects, are curious, and possibly want to go to university later (e.g., business, tech, law, medicine).

🔧 2. Erhvervsuddannelser (Vocational education and training - EUD)

A hands-on path where you combine school with apprenticeships.

You can train to become things like:

- Electrician
- Carpenter
- Chef
- Social and health worker
- IT technician

Best for you if:

You prefer **practical work** and want to start working earlier (though you can still continue studying later)

with EUX).

You can also consider:

- **EUX** – Combines vocational training **and** upper secondary academic courses, so you get both a craft and access to university.

Personal Factors to Consider:

- **Your interests:** Do you prefer working with people, technology, business, hands-on work?
- **Your academic strengths:** Are you better at theory or practical work?
- **Family background:** If you're interested in combining your Vietnamese background with international business, language, or culture, HHX or STX could be great choices.
- **Long-term goals:** Do you dream of being a doctor, engineer, businessperson, or something else?

Suggestions Based on You:

- If you enjoy **studying, exploring ideas, and possibly university**, then **STX, HHX, or HTX** are strong paths.
- If you want a **balance between practical skills and academic opportunity**, consider **EUX**.
- If you're unsure what you want, **HF** is a shorter and more flexible route.
- Don't underestimate **EUD** – Denmark has a strong vocational system, and you can still move on to higher education later if you want.

Next Steps

1. Talk to a **school counselor (UU-vejleder)** – they can help match your interests with programs in your area.
2. Visit **open house events** at local schools to feel the atmosphere.
3. Reflect on what **motivates you and what type of work/life** you imagine in 5–10 years.

Would you like help exploring careers based on your interests? I can give you a short quiz or list of possible careers to consider.
