

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Albania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — it's great that you're reflecting on your next step! Since you've completed primary school (**folkeskole**) in Denmark at age 16, you're at an important decision point. Let's break it down so you can consider the best options based on your interests, strengths, and goals.

Main educational paths after primary school in Denmark

Here are the common types of upper secondary education:

Gymnasiale uddannelser (General upper secondary education)

Designed if you want to continue to higher education (university, professional degrees, etc.):

- **STX (Almen studentereksamen)** – Focus on general subjects: languages, social studies, natural sciences, arts.
- **HHX (Højere handelseksamen)** – Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, natural sciences, IT.
- **HF (Højere forberedelseksamen)** – Shorter (2 years), good if you want a more practical academic path or a more flexible route to higher education.

Erhvervsuddannelser (Vocational education and training)

- Combine school and apprenticeship (praktik) in companies.
- Examples: electrician, carpenter, healthcare assistant, chef, mechanic, etc.
- Leads to skilled trades or can also give access to further studies.

Other options

- **EUD10 / 10th grade** – If you feel like you want an extra year to improve grades or get clearer about your direction.
- **Combination programs** – For example, EUX (vocational + general upper secondary in one).

How to choose?

Think about your interests

- Do you enjoy academic subjects (math, languages, sciences)? → *STX, HHX, HTX, HF*

- Do you prefer practical work, hands-on learning, earning money while you study? → *Vocational education (EUD/EUX)*

✓ Think about your future goals

- Want to go to university or a higher education institution? → *Gymnasiale uddannelser*
- Want to learn a trade or start working sooner? → *Vocational education*

✓ Think about your learning style

- Do you like theoretical work, books, projects?
- Do you prefer practical tasks, being active, and learning by doing?

☀ Special note for your background

Your fluency in Danish is a big strength — it means you can fully engage with all options. Also, being bilingual (Danish + Albanian) could be a huge advantage in business, international studies, or public service.

💡 Recommendation

Since you're still exploring:

- ➡ If you like academic subjects and might want university later → **STX** or **HHX** (especially if business/economics interests you) or **HTX** (if you like technology/science).
- ➡ If you're unsure → Consider **HF** or 10th grade to give yourself a bit more time.
- ➡ If you know you like practical work → Explore **EUD** or **EUX**.

🎯 Next steps

- ✓ Talk to your school guidance counselor (*uddannelsesvejleder*).
- ✓ Visit open houses at local gymnasiums and vocational schools.
- ✓ Think about what subjects or activities you've enjoyed the most.
- ✓ Consider trying job shadowing or internships (*praktik*) to see what suits you.

If you'd like, tell me:

- 👉 What subjects do you enjoy most?
- 👉 Do you have any dream jobs or fields in mind?

I can help you narrow it down even more! 🚀
